Transforming Talk into Text—Argument Writing, Inquiry, and Discussion, Grades 6-12 Thomas M.

McCann, 2014-05-23 Author Thomas McCann invites readers to rethink their approach to teaching writing by capitalizing on students' instinctive desire to talk. Drawing on extensive classroom research, he shows teachers how to craft class discussions that build students' skills of analysis, problem solving, and argumentation as a means of improving student writing. McCann demonstrates how authentic discussions immerse learners in practices that become important when they write. Chapters feature portraits of teachers at work, including transcripts that reveal patterns of talk across a set of lessons. Interviews with the teachers and samples of student writing afford readers a deeper understanding of process. Students also report on how classroom discussions supported their effort to produce persuasive argument-driven essays. Book Features: A focus on the thinking behind the practice, as opposed to a collection of lesson ideas; Connections to important elements from the Common Core State Standards, especially arguments writing; Examples of students at work with examples of the writing that emerges from their discussions; Portraits of skilled teachers as they promote inquiry and sequence and facilitate discussions; Appendices with problem-based scenarios, interview questions for students and teachers, samples of debatable cases in the news, and more. In this important book, Tom McCann has given us not only the admonition to change but the details about what effective change must be and what it looks like: evidence that it works effectively and details about how to bring it to pass. From the Foreword by George Hillocks Jr., Professor Emeritus, Department of English, University of Chicago. For a professional book to have an impact on the field, it needs to address a perceived need. Writing arguments for Common Core performance assessments is a HUGE need right now, that this book helps address. Resources in Education, 2001-10 A Comparative Study of Writing Abilities in Two Modes at the Grade 5, 8, and 12 Levels Ian Pringle, Aviva Freedman, Ontario. Ministry of Education, Ontario. Ministry of Colleges and Universities, 1985. The third of three studies involving a comparative analysis of transactional and narrative writing of selected samples of students in two Ontario districts, this study addressed questions arising from the earlier studies and examined the writing skills of students in grades 5, 8, and 12. Writing samples were examined for conformity to the norms of story structure and argumentation and the subject matter of the transactional writing was analyzed. The level of affective development manifested in subsamples of both the stories and the arguments was rated. All the papers in the sample were analyzed for syntactic complexity scores and for mechanical and conventional errors. Comparisons of the first and second versions of the papers were made to assess skills in revising and editing. Findings indicated the need of students to learn how to write an argument and to revise a paper. Other implications were:

1. that since the level of difficulty of one aspect of a writing task may decrease, the lack of control in another, teachers must take into account the nature of difficulties in the tasks they set students and make their assessments accordingly;
2. that students at all levels should be given occasions to write narratives;
3. that the model of persuasive discourse should be countered; and
4. that writing strategies recommended by authorities need to be implemented.
