The Land Bridge

Dashes represent errors

0 During the last ice age, the world looked much different than it does 13
13 today. Nearly all the land was covered with huge sheets of ice or glaciers. 27
27 Most of the world's water was trapped in these glaciers, and the water 40
40 level of the seas was low. A vast amount of land was above the water. 55
55 The narrow waterway between Asia and North America, the Bering 65
65 Strait, was mostly exposed land at that time. The land formed a narrow 78
78 bridge that connected Asia with North America. This land bridge was 89
89 cold and flat, and was covered by grass and shrubs. Before the formation 102
102 of the land bridge, early people who wanted to travel to North America 115
115 had to go by boat. Very few people actually made the 129
129 water. Many more people traveled to North America
141 to walk across the land bridge.
