

What are the similarities and differences of Plato's, Aristotle's and Rene Descartes' concept of the self?

Philosophers	Similarities	Differences
Plato	Plato, Aristotle, and Descartes concept of the self is innate in which the human person is inborn with ideas and seeking to discover things within the self through experiences. This view of self exemplifies what it means to be a rationalist and as well as being an example of empiricist perspective.	He believes that the self or the human person is composed of two forms which are the body and soul that is destructible and indestructible. The human is responsible to figure things out and assert control to establish harmonious relationships of the three elements of the soul.
Aristotle		He believes that the soul is the essence of the self which anything with life has soul. For Aristotle, to experience good, thriving and fulfilling life, one must attain the three fold nature; vegetative, sensitive, and rational soul to be called a living being.
Descartes		He suggests that there are two dimensions of the self: the mind-body dualism in which the mind and the body are completely distinct things and neither can exist without the other. He also concurred the phrase "I think therefore I am", which states that a rational thinker who is self aware is the proof that there is a self.
