Whats Wrong Applied Ethicists And Their Critics:

What's Wrong? David Boonin, Graham Oddie, 2010 What's Wrong Applied Ethicists and Their Critics is a thorough and engaging introduction to applied ethics that covers virtually all of the issues in the field. Featuring more than ninety-five articles, it addresses standard topics such as abortion, euthanasia, capital punishment, world hunger, and animal rights, and also delves into cutting-edge areas like cloning, racial profiling, same-sex marriage, prostitution, and slave reparations. The volume includes seminal essays by prominent philosophers Robert Nozick, James Rachels, Peter Singer, and Judith Jarvis Thomson, alongside work by newer voices in the field. Employing a unique approach to teaching argumentation, editors David Boonin and Graham Oddie unify the wealth of material presented in this collection. Each chapter opens with a featured article that takes a strong stand on a particular issue; the essays that immediately follow offer objections and critical responses to the arguments put forth in the featured selection. This format helps students learn how to better engage in debates because it illustrates how philosophers argue with each other. In addition, a general introduction describes strategies for understanding and evaluating the different types of arguments contained in the readings, while detailed chapter introductions enable students to see precisely how the arguments presented in the various writings are related to one another. Discussion questions and suggestions for further reading are included for each chapter. Ideal for courses in introduction to ethics and applied ethics, contemporary moral problems, What's Wrong can also be used in critical thinking courses that emphasize philosophical argumentation.

Insights into Ethical Theory and Practice Francis Fallon, 2022-02-06 Ethical issues hold great importance for all of us, but expert accounts of them are difficult to access for those outside academics. This volume bridges that gap by framing a variety of essays within the field in a way that renders them accessible to experts and non-experts alike. Many collections on ethics re-publish classic essays and offer contextualization and analysis, while other volumes of emerging innovative work presuppose a background in the field. This book uniquely borrows from both approaches, offering emerging innovative work carefully curating its order for sense and presenting the work so that non-experts may understand it. The field of ethics is an eclectic one. Where other collections on ethics may intimidate the reader by representing the field as an organized monolith or as impenetrable to outsiders, this volume is designed to give readers confidence and enthusiasm in approaching a diverse and lively subject.

Applied Ethics Elizabeth Jackson, Tyron Goldschmidt, Dustin Crummett, Rebecca Chan, 2021-11-03 Applied Ethics: An Impartial Introduction prepares readers to evaluate selected classical and contemporary problems in applied ethics in a way that does justice to their complexity without sacrificing clarity or fairness of representation. Its balanced exposition and analysis, enhanced by helpful pedagogical features, make it an ideal book for introducing the ethics of real-life problems, including abortion, animal rights, disability, the environment, poverty, and punishment.

David Boonin presents a new account of the non identity problem a puzzle about our obligations to people who do not yet exist Our actions sometimes have an effect not only on the quality of life that people will enjoy in the future but on which particular people will exist in the future to enjoy it In cases where this is so the combination of certain assumptions that most people seem to accept can yield conclusions that most people seem to reject The non identity problem has important implications both for ethical theory and for a number of topics in applied ethics including controversial issues in bioethics environmental ethics and disability ethics It has been the subject of a great deal of discussion for nearly four decades but this is the first book length study devoted exclusively to its examination Boonin begins by explaining what the problem is why the problem matters and what criteria a solution to the problem must satisfy in order to count as a successful one He then provides a critical survey of the solutions to the problem that have thus far been proposed in the sizeable literature that the problem has generated and concludes by developing and defending an unorthodox alternative solution one that differs fundamentally from virtually every other available approach *Proceedings and Addresses of the American Philosophical Association* American Philosophical Association,2008 List of members in v 1
