When China Ruled The Seas:

When China Ruled the Seas Louise Levathes, 1994 The Treasure Fleet of the Dragon Throne 1405 33 When China Ruled the Seas Louise Levathes, 1996 *When China Ruled the Seas* Louise Levathes, 2014-12-02 One hundred years before Columbus and his fellow Europeans began their voyages of discovery fleets of giant junks commanded by the eunuch admiral Zheng He and filled with the empire's finest porcelains lacquerware and silk ventured to the world's four corners Seven epic expeditions brought China's treasure ships across the China Seas and Indian Ocean from Japan to the spice island of Indonesia and the Malabar Coast of India on to the rich ports of the Persian Gulf and down the East African coast to China's El Dorado and perhaps even to Australia three hundred years before Captain Cook's landing It was a time of exploration and expansion but it ended in a retrenchment so complete that less than a century later it was a crime to go to sea in a multimasted ship In *When China Ruled the Seas* Louise Levathes takes a fascinating and unprecedented look at this dynamic period in China's enigmatic history focusing on the country's rise as a naval power that briefly brought half the world under its nominal authority Drawing on eyewitness accounts official Ming histories and African Arab and Indian sources many translated for the first time Levathes brings readers inside China's most illustrious scientific and technological era She sheds new light on the historical and cultural context in which this great civilization thrived as well as the perception of China by other contemporary cultures Beautifully illustrated and engagingly written *When China Ruled the Seas* is the fullest picture yet of the early Ming dynasty the last flowering of Chinese culture before the Manchu invasion **Leaders** General Stanley McChrystal, Jeff Eggers, Jay Mangone, 2018-10-23 An instant national bestseller Stanley McChrystal the retired US Army general and bestselling author of *Team of Teams* profiles thirteen of history's great leaders including Walt Disney Coco Chanel and Robert E Lee to show that leadership is not what you think it is and never was Stan McChrystal served for thirty four years in the US Army rising from a second lieutenant in the 82nd Airborne Division to a four star general in command of all American and coalition forces in Afghanistan During those years he worked with countless leaders and pondered an ancient question What makes a leader great He came to realize that there is no simple answer McChrystal profiles thirteen famous leaders from a wide range of eras and fields from corporate CEOs to politicians and revolutionaries He uses their stories to explore how leadership works in practice and to challenge the myths that complicate our thinking about this critical topic With Plutarch's *Lives* as his model McChrystal looks at paired sets of leaders who followed unconventional paths to success For instance Walt Disney and Coco Chanel built empires in very different ways Both had public personas that sharply contrasted with how they lived in private Maximilien Robespierre helped shape the French Revolution in the eighteenth century Abu Musab al Zarqawi led the jihadist insurgency in Iraq in the twenty first We can draw surprising lessons from them about motivation and persuasion Both Boss Tweed in nineteenth century New York and Margaret Thatcher in twentieth century Britain followed unlikely roads to the top of powerful institutions Martin Luther and his future namesake

Martin Luther King Jr both local clergymen emerged from modest backgrounds to lead world changing movements Finally McChrystal explores how his former hero General Robert E Lee could seemingly do everything right in his military career and yet lead the Confederate Army to a devastating defeat in the service of an immoral cause Leaders will help you take stock of your own leadership whether you re part of a small team or responsible for an entire nation **How**

Markey,2020 Under the ambitious leadership of President Xi Jinping China is zealously transforming its wealth and economic power into potent tools of global political influence But China s foreign policy initiatives even the vaunted Belt and Road will be shaped and redefined as they confront the ground realities of local and regional politics outside China In *China s Western Horizon* Daniel S Markey a scholar of international relations and former member of the U S State Department s policy planning staff previews how China s efforts are likely to play out along its western horizon across the swath of Eurasia that includes South Asia Central Asia and the Middle East Drawing from extensive interviews travels and historical research Markey describes how perceptions of China vary widely within states such as Pakistan Kazakhstan and Iran Powerful and privileged groups across the region often expect to profit from their connections to China while others fear commercial and political losses Similarly Eurasian statesmen are scrambling to harness China s energy purchases arms sales and infrastructure investment These leaders are working with China in order to outdo their strategic competitors including India and Saudi Arabia and simultaneously negotiating relations with Russia and America On balance Markey anticipates that China s deepening involvement will play to the advantage of regional strongmen and exacerbate the political tensions within and among Eurasian states To make the most of America s limited influence in China s backyard and elsewhere he argues that U S policymakers should pursue a selective and localized strategy to serve America s specific aims in Eurasia and to better

compete with China over the long run **China: The Stealth Empire** Edward Burman, 2008-06-08 China The Stealth Empire asks why it is that China despite its size and once advanced culture and technology did not become a world power centuries ago Burman traces the answer through Chinese innate sense of superiority which made foreign conquest and trade an irrelevance This is about to change with the evolution of what is termed the Stealth Empire characterised by world dominance in the production of consumer goods a growing share of world manufacturing and a strong sense of nationalism The Chinese believe that they need to do nothing as they evolve by the middle of the century into the dominant world power Burman's book opens a window onto this history and growing sense of national destiny It will be essential reading for anyone wanting to understand what is going on in the Stealth Empire **From the Mediterranean to the China Sea** C.

Guillot, Denys Lombard, Roderich Ptak, 1998 With the assistance of Richard Teschke **The East and West in Late Medieval Travel Writings** Na Chang, 2024-10-07 This book traces the history of encounter between Eastern and Western cultures by closely examining a body of medieval travel writings penned or related by Europeans and by inhabitants of East Asia Whilst these texts are usually considered in the context of kindred European or Chinese literature this study will make a case for considering them as a common literature of medieval encounters with foreign people For the modern historian writing in a world that so consciously thinks of itself as global these accounts offer a precious lens through which to enter into the world before globalization In particular the book shows that these narratives show the similarity in how Eastern and Western travellers thought and behaved in the face of difference and will show that individuals often held somewhat different views shaped by their particular experience or agendas than those of their government or of local cultural convention

Military Transition in Early Modern Asia, 1400-1750 Kaushik Roy, 2014-05-22 A substantial amount of work has been carried out to explore the military systems of Western Europe during the early modern era but the military trajectories of the Asian states have received relatively little attention This study provides the first comparative study of the major Asian empires military systems and explores the extent of the impact of West European military transition on the extra European world Kaushik Roy conducts a comparative analysis of the armies and navies of the large agrarian bureaucratic empires of Asia focusing on the question of how far the Asian polities were able to integrate gunpowder weapons in their military systems *Military Transition in Early Modern Asia 1400 1750* offers important insights into the common patterns in war making across the region and the impact of firearms and artillery *Great Powers and Geopolitical Change* Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics In an era of high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and

maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena

Eden and the Fall - the Fallacies of Radical Ecological History, 1999 Radical ecology claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today's ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to numerous empirical errors each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t
