When The Lights Go Out English Edition:

When the Lights Go Out, and Never Come Back On, 1991-06 Identifies a variety of left and right wing groups in America which might have a reason to be active terrorists in the future A viable target for such groups is nuclear power plants

Before the Lights Go Out Maggie Koerth-Baker, 2012-02-21 What you need to know now about America's energy future Hi I'm the United States and I'm an oil oholic We have an energy problem And everybody knows it even if we can't all agree on what specifically the problem is Rising costs changing climate peaking oil foreign oil public safety if the fears are this complicated then the solutions are bound to be even more confusing Maggie Koerth Baker science editor at the award winning blog BoingBoing.net finally makes some sense out of the madness Over the next 20 years we'll be forced to cut 20 quadrillion BTU worth of fossil fuels from our energy budget by wasting less and investing in alternatives To make it work we'll need to radically change the energy systems that have shaped our lives for 100 years And the result will be neither business as usual nor a hippie utopia Koerth Baker explains what we can do what we can't do and why The Solution is really a lot of solutions working together This isn't about planting a tree buying a Prius and proving that you're a good person Economics and social incentives got us a country full of gas guzzling cars long commutes inefficient houses and coal fired power plants out in the middle of nowhere and economics and incentives will be the things that build our new world Ultimately change is inevitable Argues we're not going to solve the energy problem by convincing everyone to live like it's 1900 because that's not a good thing Instead of reverting to the past we have to build a future where we get energy from new places use it in new ways and do more with less Clean coal Natural gas Nuclear Electric cars We'll need them all When you look at the numbers you'll find that we'll still be using fossil fuels nuclear and renewables for decades to come Looks at new battery technology smart grids passive buildings decentralized generation clean coal and carbon sequestration These are buzzwords now but they'll be a part of your world soon For many people they already are Written by the cutting edge

When the Lights Went Out Gare Joyce,2006 When the Lights Went Out tells the story of a moment in the 1987 World Junior Championship that forever changed the lives of the players involved and ignited a debate that has yet to subside about the way the game is meant to be played When Team Canada skated onto the ice that night in Piestany Czechoslovakia they thought they were 60 minutes away from a gold medal Future superstars like Brendan Shanahan and Theo Fleury pitted against Russians like Alexei Fedorov and Alex Mogilny dreamed of returning to Canada in glory Instead they were sent home empty handed bearers of a legacy that would follow them throughout their careers No one who saw it will ever forget it The mere mention of Piestany evokes the image of twenty fights breaking out all over the ice as players rushed to their mates defence of haymakers stick swinging and even kicking of a referee skating off the ice in shame ESPN hockey writer Gare Joyce tells the story of the game that marked the last time Canadian and Soviet players squared off as enemies rather than potential team mates in the NHL It tells the stories of the combatants on the ice Of the coaches behind the bench Of officials international hockey executives members of the media and even politicians who were caught up in the intrigue
