## Measuring Wounds

Measure the length "head-to-toe" at the longest point (A). Measure the width side-to-side at the widest point (B) that is perpendicular to the length, forming a "+". Measure the depth (C) at the deepest point of the wound. *All measures should be in centimeters.*

*This ruler is intended for use as a reference only. To prevent infection, do not use this ruler to measure an actual wound.*

Using a clock format, describe the location and extent of tunneling (sinus tract) and/or undermining.

*The head of the patient is 12:00, the patient's foot is 6:00.*

## Tunneling/Sinus Tract

A narrow channel or passageway extending in any direction from the base of the wound. This results in dead space with a potential risk for abscess formation.

## Undermining

Open area extending under intact skin along the edge of the wound.

If the wound has many landmarks, you may want to trace it before measuring.
