

The purpose of this report is to evaluate the efficiency of the economic course which I completed. It is based on my personal experience, which I received while taking part in the aforementioned course.

General Findings

The course as a whole was very engaging and helpful. As it took place in the economical environment, many aspects of the economy, which will not be taught at school, could be learned through this course.

Points worthy of praise

The course has found many businesses, with which they cooperate, therefore I took away some insights from different companies by listening to many subject matter experts. There is nothing better than learning from business experts who are managing their own companies. I learned a substantial amount of methods and specific strategies to that field, which makes the course very useful, should you manage to increase the revenue in your company, coping with a subject it can increase your knowledge.

Issues

No issues can be raised about the work part of the course. However, some theoretical classes that take place in the morning offer no substantial benefit over practical classes taken in the afternoon, even if they are taught with some real use cases.

Suggestions

I would recommend to everyone this course if the organizer of the course could increase the amount of practical sessions that is spent working during the course and reduce the amount of theoretical classes taken. Moreover the organizer should keep finding more companies with which to cooperate, to make the course attractive to more students with different interests.

Beyond the Five Whys James C. Paterson,2023-11-14 A straightforward explanation of root cause analysis and systems thinking illustrating with real world examples and first hand accounts why things can slip through our fingers and what to do to reduce the chances of things going off track *Beyond the Five Whys* summarises for the first time many of the tried and tested ways of understanding problems using insights from aviation high reliability organisations and a range of thought provoking sources The book provides readers with a clear and structured explanation how to analyse setbacks and head off problems in the first place It will challenge much of the received wisdom such as the idea there can be one root cause or that a person or bad culture could be a root cause Specific areas covered Learn what root causes are how they differ from

immediate and contributing causes and why it's so important to go beyond the Five Whys technique for root cause analysis
 Recalibrate the way you think about things going wrong incorporating insights from systems thinking so you can be clearer
 what cultural or systemic problems mean in practice Learn about the eight principal ways things can slip through our fingers
 Go beyond the blame game and firefighting to avoid the never ending cycle of repeating issues Strengthen your ability to
 read the output of a lessons learned or enquiry report Get a fresh perspective using these techniques on why the Titanic
 tragedy turned out so badly and understand the numerous parallels between what happened then and a range of recent
 setbacks we have seen such as the Covid 19 pandemic Consider the broader application of these techniques to some of the
 challenges we face in the 21st century Beyond the Five Whys also contains supplemental guidance how to make

 necessary muda Internal auditors need to understand not only who their primary customers are but what is valuable to them
 which in most cases is assurance that the risks that matter to the achievement of objectives are properly managed We need
 to communicate what they need to know and not what we want to say This incessant focus on the customer and the efficient
 production of a valued product should extend to every internal audit team How else can we ensure that we optimize the use
 of our limited resources to address the dynamic business and risk environment within which our organizations operate

 Auditing is a practical guide to maximising value and efficiency in internal audit through the application of lean techniques It
 is an ideal book for anyone interested in understanding what progressive value adding audit can be like It is also ideal for
 anyone wondering whether audit activities can be streamlined or better co ordinated with other activities The book contains
 practical advice from the author's experience as CAE of AstraZeneca PLC from his work as a consultant specializing in this
 field as well as insights from leading CAEs in the UK US and elsewhere In addition there are important insights from thought
 leaders such as Richard Chambers IIA US and Norman Marks GRC thought leader and Chris Baker Technical Manager of the
