Baldwin,2024-12-17 How the innate physical properties of different technologies influence the strategy and structure of the organizations implementing the technologies the sequel to Design Rules The Power of Modularity In Design Rules volume 2

Carliss Baldwin offers a comprehensive view of the digital economy by putting forth an original theory that explains how technology shapes organizations in a market economy. The theory claims that complementarities arising from the physical nature of technologies can be arrayed on a spectrum ranging from strong to very weak. Two basic types of technologies in turn exhibit different degrees of complementarity between their internal components. Flow production technologies, which are found in steel mills and auto factories, specify a series of steps each of which is essential to the final product. In contrast, platform technologies, which are characteristic of computer hardware, software, and networks, are modular systems designed to provide options. Baldwin then investigates the dynamics of strategy for firms in platform ecosystems. Such firms create value by solving technical bottlenecks, technical barriers to performance that arise in different parts of the system as it evolves. They capture value by controlling and defending strategic bottlenecks, components that are 1) essential to the functioning of some part of the system, 2) unique, and 3) controlled by a profit-seeking enterprise. Strategic bottlenecks can be acquired by solving technical bottlenecks. They can be destroyed via tactics such as substitution, reverse engineering, bypassing the bottleneck, and enveloping a smaller bottleneck within a larger one. Strategy in platform ecosystems can thus be viewed as the effective management of technical and strategic bottlenecks within a modular technical system. Federal Register, 2013-04. Congressional Record, United States, Congress, 1969. *New Technologies, Development and Application V*. Isak Karabegović, Ahmed Kovačević, Sadko Mandžuka, 2022-05-25. This book features papers focusing on the implementation of new and future technologies which were presented at the International Conference on New Technologies Development and Application held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on 23rd-25th June 2022. It covers a wide range of future technologies and technical disciplines including complex systems such as industry 4.0, patents in industry 4.0, robotics, mechatronics, systems automation, manufacturing, cyber physical and autonomous systems, sensors, networks, control, energy, renewable energy sources, automotive and biological systems, vehicular networking and connected vehicles, intelligent transport effectiveness and logistics systems, smart grids, nonlinear systems, power, social and economic systems, education, IoT. The book *New Technologies Development and Application V* is oriented towards the Fourth Industrial Revolution, Industry 4.0, in which implementation will improve many aspects of human life in all segments and lead to changes in business paradigms and production models. Further, new business methods are emerging, transforming production systems, transport, delivery, and consumption, which need to be monitored and implemented by every company involved in the global market.
