Robots Are People Too John Frank Weaver, 2013-11-26 The only book of its kind to look at how our legal system needs to change to accommodate a world in which machines in addition to people make decisions For years robots were solely a matter of science fiction Today artificial intelligence technologies serve to accelerate our already fast paced lives even further From

Apple's Siri to the Google Car to GPS machines and technologies that make decisions and take action without direct human supervision have become commonplace in our daily lives. As a result, laws must be amended to protect companies that produce robots and the people that buy and use them. This book provides an extensive examination of how numerous legal areas including liability, traffic zoning, and international and constitutional law must adapt to the widespread use of artificial intelligence in nearly every area of our society. The author scrutinizes the laws governing such fields as transportation, medicine, law enforcement, childcare, and real estate development. *Improving Highway and Vehicle Safety* United States Congress, Senate, Committee on Commerce, Science, and Transportation, Subcommittee on Consumer Protection, Product Safety, and Insurance, 2012

Design of Electrical Transmission Lines Sriram Kalaga, Prasad Yenumula, 2016-12-19 This book covers structural and foundation systems used in high voltage transmission lines: conductors, insulators, hardware, and component assembly. In most developing countries, the term transmission structures usually means lattice steel towers. The term actually includes a vast range of structural systems and configurations of various materials such as wood, steel, concrete, and composites. This book discusses those systems along with associated topics such as structure functions and configurations, load cases for design, analysis techniques, structure and foundation modeling, design deliverables, and latest advances in the field. In the foundations section, theories related to direct embedment, drilled shafts, spread foundations, and anchors are discussed in detail. Featuring worked-out design problems for students, the book is aimed at students, practicing engineers, researchers, and academics. It contains beneficial information for those involved in the design and maintenance of transmission line structures and foundations. For those in academia, it will be an adequate textbook; design guide for graduate-level courses on the topic. Engineers and managers at utilities and electrical corporations will find the book a useful reference at work. *Official U.S. Bulletin*, 1918

Lemon-Aid New Cars and Trucks 2012 Phil Edmonston, 2011-12-03 Lemon Aid guides the confused and anxious buyer through the economic meltdown unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil, pulls no punches. He says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide, he says Audis are beautiful to behold but hell to own, biodegradable transmissions, rodent snack wiring, and mind-boggling depreciation. Many 2011-12 automobiles have chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago. You can save 2,000 by cutting freight fees and administrative charges. Diesel annual urea fill-up scams cost you 300, including an 80 handling charge for 25 worth of urea. New and Used Cars and Trucks 2007-2017 Phil Edmonston, 2017-03-11 Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car and truck book on the market Dr Phil along with George Iny and the Editors of the Automobile Protection Association pull no punches

Northeast American Sports Car Races

1950-1959 Terry O'Neil, 2010 This book focuses on the different aspects that contributed to the development of Northeast American sports car racing during the 1950s The evolution from amateur drivers racing on public roads in 1950 to both professional and amateur drivers racing at private purpose built tracks in 1959 demanded huge leaps of faith trust and understanding The transition was neither easy nor uneventful for drivers clubs or track owners and the tragedy politics and in
