The Bestseller Code Jodie Archer, Matthew L. Jockers, 2016-09-20 What if there was an algorithm that could predict which novels become mega bestsellers Are books like Dan Brown s The Da Vinci Code and Gillian Flynn s Gone Girl the Gladwellian outliers of publishing This book boldly claims that the New York Times bestsellers in fiction are predictable and that it s possible to know with 97% certainty if a manuscript is likely to hit number one on the list as opposed to numbers two through fifteen The algorithm does exist the code has been cracked the results are in **Becoming Bestsellers: John Grisham and Danielle Steel (Sample from Chapter 2 of THE BESTSELLER CODE)** Jodie Archer, Matthew L. Jockers, 2016-08-16 This sneak peek teaser featuring literary giants John Grisham and Danielle Steele from Chapter 2 of The Bestseller Code a groundbreaking book about what a computer algorithm can teach us about blockbuster books stories and reading reveals the importance of topic and theme in bestselling fiction according to percentages assigned by what the

authors refer to as the bestseller o-meter. Although 55 000 novels are published every year, only about 200 hit the lists, a commercial success rate of less than half a percent. When the computer was asked to blindly select the most likely bestsellers out of 5 000 books published over the past thirty years based only on theme, it discovered two possible candidates: *The Accident* by Danielle Steel and *The Associate* by John Grisham. The computer recognized quantifiable patterns in their seemingly opposite but undeniably successful writing careers with legal thrillers and romance. In Chapter 2, Archer and Jockers analyze this data and divulge the most and least likely to best sell topics and themes in fiction with a human discussion of the why behind these results. *The Bestseller Code* is a big idea book about the relationship between creativity and technology. At heart, it is a celebration of books for readers and writers, a compelling investigation into how successful writing works.
