Network-Design Problems in Graphs and on the Plane Krzysztof Fleszar, 2018-12-06 Given points in the plane connect them using minimum ink Though the task seems simple it turns out to be very time consuming In fact scientists believe that computers cannot efficiently solve it So do we have to resign This book examines such NP hard network design problems from connectivity problems in graphs to polygonal drawing problems on the plane First we observe why it is so hard to optimally solve these problems Then we go over to attack them anyway We develop fast algorithms that find approximate solutions that are very close to the optimal ones Hence connecting points with slightly more ink is not hard

Kishk,Allen W. Glisson,2022-06-01 This book gives a step by step presentation of a generalized transmission line method to study the far zone radiation of antennas under a multilayer structure Normally a radiation problem requires a full wave analysis which may be time consuming The beauty of the generalized transmission line method is that it transforms the radiation problem for a specific type of structure say the multilayer structure excited by an antenna into a circuit problem that can be efficiently analyzed Using the Reciprocity Theorem and far field approximation the method computes the far zone radiation due to a Hertzian dipole within a multilayer structure by solving an equivalent transmission line circuit Since an antenna can be modeled as a set of Hertzian dipoles the method could be used to predict the far zone radiation of an antenna under a multilayer structure The analytical expression for the far zone field is derived for a structure with or without a polarizer The procedure of obtaining the Hertzian dipole model that is required by the generalized transmission line method is also described Several examples are given to demonstrate the capabilities accuracy and efficiency of this method Table of Contents Antennas Under a Multilayer Dielectric Slab Antennas Under a Polarized Multilayer Structure Hertzian Dipole Model for an Antenna Bibliography Biography *The Engineer and Machinist's Drawing-book; a Complete Course of Instruction for the Practical Engineer ...
