CHOOSING THE RIGHT CYCLE

A cycle guide for your washer can be found online at www.whirlpool.com. This document will help identify which cycle to choose for various load types as well as the default cycle options. For example we recommend using the NORMAL cycle with Warm water for cottons, linens, and mixed-garment loads.

MORE WATER WHEN YOU WANT IT

AUTO SENSING AND DEEP WATER

The washer will adjust the water level to the optimal amount for a High-Efficiency wash of the detected load size.
Press Deep Water to automatically add more water to your wash cycle.
It is recommended to use BULKY ITEMS cycle with Deep Water option for loads where maximum water level is desired.
Expect longer cycle times due to extended fill duration when using the Deep Water option.

PRE-TREATING BEFORE A WASH CYCLE

Press the Pre-treat button once to turn on and press again to turn off.
Pre-treat will automatically shut off after 30 minutes if water level is reached.
Water will automatically drain if you leave the lid open for 3 hours if the lid is left closed.

CLEANING WITH LESS WATER

The washer has been designed and optimized to provide a thorough cleaning using less water to conserve energy and resources.
As the washer designs and moves the load, the level of the items will settle in the basket. This is normal, and does not indicate that more items should be added.
IMPORTANT: You will not see a full basket of water as with other, less efficient washing machines. It is normal for some of the load to be above the water line.
