White Bread A Social History Of The Store Bought Loaf:

White Bread Aaron Bobrow-Strain, 2012-03-06 The story of how white bread became white trash this social history shows how our relationship with the love it or hate it food staple reflects our country's changing values In the early twentieth century the factory baked loaf heralded a bright new future a world away from the hot dusty dirty bakeries run by immigrants Fortified with vitamins this bread was considered the original superfood and even marketed as patriotic while food reformers painted white bread as a symbol of all that was wrong with America So how did this icon of American progress become white trash In this lively history of bakers dietary crusaders and social reformers Aaron Bobrow Strain shows us that what we think about the humble puffy loaf says a lot about who we are and what we want our society to look like It teaches us that when Americans debate what one should eat they are also wrestling with larger questions of race class immigration and gender As Bobrow Strain traces the story of bread from the first factory loaf to the latest gourmet pain au levain he shows how efforts to champion good food reflect dreams of a better society even as they reinforce stark social hierarchies The history of America's love hate relationship with white bread reveals a lot about contemporary efforts to change the way we eat Today the alternative food movement favors foods deemed ethical and environmentally friendly and fluffy industrial loaves are about as far from slow local and organic as you can get Still the early twentieth century belief that getting people to eat a certain food could restore the nation's decaying physical moral and social fabric will sound surprisingly familiar Given that open disdain for unhealthy eaters and discrimination on the basis of eating habits grow increasingly acceptable *White Bread* is a timely and important examination of what we talk about when we talk about food

Geographies of Race and Food Rachel Slocum, Arun Saldanha, 2016-04-15 While interest in the relations of power and identity in food explodes a hesitancy remains about calling these racial What difference does race make in the fields where food is grown the places it is sold and the manner in which it is eaten How do we understand farming and provisioning tasting and picking eating and being eaten hunger and gardening better by paying attention to race This collection argues there is an unacknowledged racial dimension to the production and consumption of food under globalization Building on case studies from across the world it advances the conceptualization of race by emphasizing embodiment circulation and materiality while adding to food advocacy an antiracist perspective it often lacks Within the three socio physical spatialities of food fields bodies and markets the collection reveals how race and food are intricately linked An international and multidisciplinary team of scholars complements each other to shed light on how human groups become entrenched in myriad hierarchies through food at scales from the dining room and market stall to the slave trade and empire Following foodways as they constitute racial formations in often surprising ways the chapters achieve a novel approach to the process of race as one that cannot be reduced to biology culture or capitalism

Gastrofashion from Haute Cuisine to Haute Couture

Adam Geczy, Vicki Karaminas, 2022-11-03 For hundreds of years consumers and scholars have acknowledged that food is

affected by the same rapid shifts in taste and consumption as clothing Trends in fashion and in food are increasingly being marketed in tandem and sold as fashionable commodities to reinforce capitalist power Yet despite this the reciprocal relationship between fashion and food has not been fully explored until now *Gastrofashion* from Haute Cuisine to Haute Couture examines the relationship between food and fashion in clothing style and dress in all its manifestations from the restaurant to the catwalk to cookbooks diet fads slow food fast fashion celebrity chefs artists and musical performers It traces the relationship between food and fashion back to the Middle Ages to the rise of social refinements in manners speech clothing and taste when behaviours and appearances reflected social status and propriety and where the social display of wealth and privilege were inseparable from food and clothing Nowadays designer eateries such as Pasticceria Prada and Armani Ristorante and the display of food on fashion catwalks are the precursors of the restaurants of pre Revolutionary France and the spectacles of world fairs and exhibitions This much needed book offers a substantive and incisive discussion for all those interested in the complex interrelationship between food and fashion scholars students and general readers alike

Upsetting Food Jeffrey Haydu, 2021-05-28 Compares U S food reform campaigns through historical social movements each driven by capitalism but shaped by activism **Every Nation Has Its Dish** Jennifer Jensen Wallach, 2018-11-13 Jennifer Jensen Wallach's nuanced history of black foodways across the twentieth century challenges traditional narratives of soul food as a singular style of historical African American cuisine Wallach investigates the experiences and diverse convictions of several generations of African American activists ranging from Booker T Washington and W E B Du Bois to Mary Church Terrell Elijah Muhammad and Dick Gregory While differing widely in their approaches to diet and eating they uniformly made the cultivation of proper food habits a significant dimension of their work and their conceptions of racial and national belonging Tracing their quests for literal sustenance brings together the race food and intellectual histories of America Directly linking black political activism to both material and philosophical practices around food Wallach frames black identity as a bodily practice something that conscientious eaters not only thought about but also did through rituals and performances of food preparation consumption and digestion The process of choosing what and how to eat Wallach argues played a crucial role in the project of finding one's place as an individual as an African American and as a citizen

Canned Anna Zeide, 2018-03-06 2019 James Beard Foundation Book Award winner. Reference History and Scholarship. A century and a half ago when the food industry was first taking root few consumers trusted packaged foods. Americans had just begun to shift away from eating foods that they grew themselves or purchased from neighbors. With the advent of canning consumers were introduced to foods produced by unknown hands and packed in corrodible metal that seemed to defy the laws of nature by resisting decay. Since that unpromising beginning the American food supply has undergone a revolution moving away from a system based on fresh locally grown goods to one dominated by packaged foods. How did this come to be? How did we learn to trust that food preserved within an opaque can was safe and desirable to eat? Anna Zeide reveals the answers through the story of the canning industry taking us on a journey to understand how food industry leaders leveraged the powers of science marketing and politics to win over a reluctant public even as consumers resisted at every turn.

Food and Femininity Kate Cairns, Josée Johnston, 2015-09-24. Over the space of a few generations women's relationship with food has changed dramatically. Yet despite significant advances in gender equality food and femininity remain closely connected in the public imagination as well as the emotional lives of women. While women encounter food related pressures and pleasures as individuals the social challenge to perform food femininities remains as the nurturing mother the talented home cook the conscientious consumer the svelte and health savvy eater. In *Food and Femininity* Kate Cairns and Josée Johnston explore these complex and often emotionally charged tensions to demonstrate that food is essential to the understanding of femininity today. Drawing on extensive qualitative research in Toronto they present the voices of over 100 food oriented men and women from a range of race and class.

backgrounds Their research reveals gendered expectations to purchase prepare and enjoy food within the context of time crunches budget restrictions political commitments and the pressure to manage health and body weight The book analyses how women navigate multiple aspects of foodwork for themselves and others from planning meals grocery shopping and feeding children to navigating conflicting preferences nutritional and ethical advice and the often inequitable division of household labour What emerges is a world in which women's choices continue to be closely scrutinized a world where failing at food is still perceived as a failure of femininity A compelling rethink of contemporary femininity this is an indispensable read for anyone interested in the sociology of food gender studies and consumer culture **Red Sauce** Ian

MacAllen, 2022-04-04 Tells the story of Italian food arriving in the United States and how your favorite red sauce recipes evolved into American staples In *Red Sauce* Ian MacAllen traces the evolution of traditional Italian American cuisine often referred to as red sauce Italian from its origins in Italy to its transformation in America into a new distinct cuisine It is a fascinating social and culinary history exploring the integration of red sauce food into mainstream America alongside the blending of Italian immigrant otherness into a national American identity The story follows the small parlor restaurants immigrants launched from their homes to large popular destinations and eventually to commodified fast food and casual dining restaurants Some dishes like fettuccine Alfredo and spaghetti alla Caruso owe their success to celebrities and Italian American cuisine generally has benefited from a rich history in popular culture Drawing on inspiration from Southern Italian cuisine early Italian immigrants to America developed new recipes and modified old ones Ethnic Italians invented dishes like lobster fra Diavolo spaghetti and meatballs and veal parmigiana and popularized foods like pizza and baked lasagna that had once been seen as overly foreign Eventually the classic red checkered table cloth Italian restaurant would be replaced by a new idea of what it means for food to be Italian even as red sauce became entrenched in American culture This book looks at how and why these foods became part of the national American diet and focuses on the stories myths and facts behind classic and some not so classic dishes within Italian American cuisine Artificial Color Catherine Keyser, 2019 This book examines

how modern US writers used the changing geographies regimens and technologies of modern food to reimagine racial classification and to question its relationship to the mutable body By challenging a cultural ideal of purity this literature proposes that racial whiteness is perhaps the most artificial color of them all *Grain of Truth* Stephen Yafa, 2016-06-07 A Pollan-esque look at the truth about wheat with surprising insights on the advantages of eating the world's most contested grain You owe it to your mind and body to step away from the gluten free frenzy long enough to do what's best for your own personal health Once you separate fact from fad you'll quickly discover the answer whole grains including wheat Most recently a Harvard School of Public Health long term study that followed 117 500 men and women over a 25 year span revealed that people who eat a whole grain rich diet lower their risk of cardiovascular disease by 20 percent and increase their lifespan at least 6 percent No other food produces similar results As for the gluten found in wheat rye and barley at

most six out of a hundred of us have any real problem with it and less than one percent of us with celiac disease cannot tolerate it in any form So why has wheat become the new asbestos Why are the shelves of every grocery store and supermarket in America heaped high with gluten free products That s what Stephen Yafa sets out to discover in *Grain of Truth* a book drawn in part from personal experience that is as entertaining as it is informative After hundreds of interviews with food scientists gluten sensitive individuals bakers nutritionists gastroenterologists and others he finds that indeed there is indeed a culprit But it s not wheat It s not gluten It s the way that grain is milled and processed by large industrial manufacturers and bakeries That discovery spurs him to search out growers millers and bakers who deliver whole wheat to us the way it was meant to be naturally fermented with all parts bran germ and white endosperm intact Yafa finds a thriving local grain movement gaining strength across the country much as the organic movement did a few decades back And as he apprentices with local artisan bakers and make his own sourdough breads at home he learns something that few of us know naturally fermented over two days as opposed to four hours in commercial bakeries whole wheat is easily digested by the vast majority of us including many who consider themselves gluten sensitive The long fermentation processing method breaks down these bulky gluten proteins into tiny fragments while slowing the conversion rate of starch to sugar in our bloodstream Along the way *Grain of Truth* challenges many common myths Yafa shows us the science that proves a gluten free diet doesn t lead to weight loss and that it isn t healthier in any way He counters common assumptions that modern wheat has been genetically manipulated to contain more gluten and he point out that despite much web chatter to the contrary there is no GMO wheat Those are only some of the reasons that *Grain of Truth* offers a badly needed fact based response to anti wheat hysteria It also offers an ingredient in short supply these days common sense measured out with just enough savvy and substance to make you reconsider what s best for you and to help you find a healthy answer in real delicious food For readers of *Salt Sugar Fat* and *The Omnivore s Dilemma* *Grain of Truth* smoothly blends science history biology economics and nutrition to give us back our daily bread
