 service science teacher preparation Each chapter includes discussion about the current state of the art with respect to
 science classroom application and utilization of the particular visual data targeted by the author s discussion and explanation
 about the targeted visual data as applied by the author in his her classroom use of visual data as a diagnostic tool its use as
 an assessment tool and discussion of implications for science teaching and or science teacher preparation Although the body
 of research and practice in this field is growing there remains a gap in the literature about clearly explicating the use of
 visual data in the science classroom A growing body of literature discusses what visual data are although this topic is still
 viewed as being at the beginning of its development in educators thinking and there are some scattered examples of studies
 exploring the use of visual data in science classrooms although those studies have not necessarily clearly identified their foci
 as visual data per se As interest and attention has become more focused on visual data a logical progression of questioning
 has been how visual data are actually applied in the science classroom whether it be early elementary college or somewhere
 in between Visual data applications of interest to the science education community include how it is identified how it can be
 used with students and how students can generate it themselves how it can be employed as a diagnostic tool in concept
 development and how it can be utilized as an assessment tool This book explores that as well as a variety of pragmatic ways
 to help science educators more effectively utilize visual data and representations in their instruction **Human Biology:**
