Forgotten Origin Steven Strong,Evan Strong,2011-03-29 Forgotten Origin is the third in a series of books dedicated to the first Homo sapiens the Australian Aboriginal people Steven Strong and Evan Strong continue in their investigation into the global impact of Aboriginal people sailing from never to Australia no less than 50 000 years ago paying particular attention to the shared principles found within

many Gnostic scriptures and the Dreaming As radical as this theory may appear the rigor applied whether through mtDNA Y Chromosomes skull morphology or historical accounts and the religious ancestry upon which this hidden history is founded demands serious consideration This is not their story Steven Strong and Evan Strong make no claim to speak on behalf of anyone They do however have the right to relay that which Aboriginal culture custodians insist is true The First Australians are unique and in no way descended from Africans or any other race Forgotten Origin is merely another reminder of this hidden truth

Acorns: Windows High-Tide Foghat Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around

Out of Australia Steven Strong,Evan Strong,2025-09-12 In their startling new book Steven and Evan Strong challenge the out of Africa theory Based on fresh examination of both the DNA and archeological evidence they conclude that modern humans originated from Australia not Africa The original Australians referred to by some as Aborigines like so many indigenous peoples are portrayed as backward and primitive Yet as the Strong demonstrate original Australians had a rich culture which may have sown the first seeds of spirituality in the world They had the technology to make international seafaring voyages and have left traces in the Americas and possibly Japan Southern India Egypt and elsewhere They practiced brain surgery invented the first hand tools and had knowledge of penicillin This book brings together 30 years of intensive research in consultation with elders in the original Australian community Among their conclusions are the following There is evidence that humans existed in Australia 40 000 years before they existed in Australia There were migrations of original Australians in large boats throughout the Indian Pacific rim Three distinct kinds of Homo sapiens are found in Australia There is evidence from the Americas that debunks the out of Africa theory The spiritual influence of the Aborigines is reflected in the religions of the world

Everyday Oracles Ann Bolinger-McQuade, 2013-07-11 It could be a cloud in the shape of a loved one's face or an extremely relevant song playing on the radio at the exact time of a friend's death if we allow ourselves to stop look and listen we can identify what spiritual teacher Ann Bolinger McQuade calls personal oracles And when we tune into these subtle messages from Spirit we will discover guidance for navigating life's most trying situations In this illuminating book readers will learn that the universe is constantly conspiring in our favor and is ready to lend a helping hand when we need it most if only we can look closely and open our hearts to the divine messages that are on display around us Sharing stories of divine inspiration from her own life as well as the lives of others many of them well known historical or contemporary figures McQuade shows readers how A PAIR OF SPARROWS SAVE A MAN'S LIFE Journalist Byron Pitts narrowly escaped being hit by a car and saw a couple birds circling in front of him The birds reminded him of the lyrics to his mother's favorite hymn His eye is on the sparrow and I know He watches me The comforting reminder of guidance and provision encouraged him to persevere in his challenging career in broadcast journalism which was ultimately rewarded when CBS offered him a position on 60 Minutes A LITTLE BOY BRINGS HOPE BACK INTO A WOMAN'S LIFE Nancy was reeling from her husband's recent diagnosis of AML a rare form of leukemia when a seven year old boy knocked at her door collecting donations for AML research He smiled at her warmly as he told her how he had had AML since he was two and then he announced proudly that a transplant had saved his life SIR ISAAC NEWTON'S APPLE WAS ACTUALLY AN EVERYDAY ORACLE Many are familiar with the story of how Sir Isaac Newton first discovered gravity when an apple fell on his head It is a lesser known fact that Newton was interested in the supernatural Born in the 1600s when astronomy and astrology were considered one and the same the highly respected alchemist looked to the heavens to assist him in his quest to decode the mysteries of the universe The

falling apple that arrested his attention acted as a personal oracle In addition to illuminating oracles through examples McQuade discusses the history and science of oracles in general and of personal oracles specifically offering the reader practical instructions for identifying and decoding the divine messages in their own lives **Mindful Conservatism** C. A. Bowers,2003 Mindful Conservatism examines how the misuse of our political vocabulary contributes to governmental corporate and educational policies that degrade the Earth s natural systems and suggests ways to overcome this linguistic confusion to help recognize the fundamental connections between communities sustainability and the conservation of the world s diverse cultures Visit our website for sample chapters Modern Shamanic Living Evelyn C Rysdyk,1999-09-01 Using shamanic journeying meditation movement sound and storytelling Rysdyk shows you how to get in touch with these parts of yourself so that you can develop the creative energy that lives inside you Using the Siberian shamanistic approach to life she explains how to evoke the inner hunter gatherer from deep within Easy exercises and some basic changes will bring you a renewed way of living full of richness peace physical health and harmony for yourself and for the future of our planet

The Origins of the World's Mythologies E.J. Michael Witzel,2012-12-13 This remarkable book is the most ambitious work on mythology since that of the renowned Mircea Eliade who all but single handedly invented the modern study of myth and religion Focusing on the oldest available texts buttressed by data from archeology comparative linguistics and human population genetics Michael Witzel reconstructs a single original African source for our collective myths dating back some 100 000 years Identifying features shared by this Out of Africa mythology and its northern Eurasian offshoots Witzel suggests that these common myths recounted by the communities of the African Eve are the earliest evidence of ancient spirituality Moreover these common features Witzel shows survive today in all major religions Witzel s book is an intellectual hand grenade that will doubtless generate considerable excitement and consternation in the scholarly community Indeed everyone interested in mythology will want to grapple with Witzel s extraordinary hypothesis about the spirituality of our common ancestors and to understand what it tells us about our modern cultures and the way they are linked at the deepest level

Time, Religion and History William Gallois,2014-06-11 What is time How does our sense of time lead us to approach the world How did the peoples of the past view time This book answers these questions through an investigation of the cultures of time in Christianity Islam Buddhism Judaism and the Australian Dreamtime It argues that our contemporary world is blind as to the significance and complexity of time preferring to believe that time is natural and unchanging This is of critical importance to historians since the base matter of their study is time yet there is almost no theoretical literature on time in history This book offers the first detailed historiographical study of the centrality of time to human cultures It sets out the complex ways in which ideas of time developed in the major world religions and the manner in which such conceptions led people both to live in ways very different to our contemporary world and to make very different kinds of histories It goes on to argue that modern scientific descriptions of time such as Einsteins Theory of Relativity lie much closer to the complex

understandings of time in religions such as Christianity than they do to our common sense notions of time which are centred on progress through a past present and future
