Architectures and Algorithms brings together the most innovative papers in the field focused introductory material and
extensive references The editors present timely coverage of algorithm and design methodologies with an emphasis on today s
rapidly evolving high speed architectures for VLSI implementations These volumes will serve as vital resources for engineers
who want a comprehensive knowledge of the extremely interdisciplinary field of high performance VLSI processing The
editors provide a practical understanding of the merits of total system design through an insightful synergistic presentation
of methodology architecture and infrastructure Each volume features Major papers that span the wide range of research
