

Visualizing Subnets Using The Circle Method

The circle method is another method used to visualize the breakdown of subnets and addresses into smaller sizes. By shading or coloring in the different sections of the circle you can easily break up your subnets without overlapping your addresses. You adjust each subnet to the correct size needed.

Start with a circle. The whole circle is a single subnet comprised of 256 addresses.

Split the circle in half and you get two subnets with 128 addresses.

Divide the circle into quarters and you get four subnets with 64 addresses.
