A Teacher's Guide to Questions/answers and Lab Exercises Prepared to Accompany the Film "Inside Hawaiian Volcanoes" Wendell A. Duffield, Richard S. Fiske, 1989 Difficult Questions Have Easy Answers Atina Hseham, 2023-12-06

An inquiry made to obtain any information is known as an interrogation While asking the person tries to get an answer that allows him to satisfy his doubts The interviewers often ask simple questions in a very twisted fashion to confuse the candidates Difficult questions answers reflect the knowledge of the giver as well as his overall personality For example Which is heavier a kilogram of feathers or 1000 grams of lead Solution Both the weights are equal And What happened in Kolkata yesterday from 8 to 9 o'clock Solution An hour had passed These questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not It can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices In some cases the answer is found in the question itself but in secret Tricky questions are also used for fun or as a mental activity of logical practice Like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say anything to him why Solution Because the truck driver was on foot He shaves all day but still has a beard who is he Solution Barber Some months have thirty days and others thirty one but how many months have twenty eight Solution Every month has at least twenty eight days Which object becomes wet When it dries Solution Towel How do you draw a square with three lines Solution draw the square first and then draw three lines inside the square Thus an answer to a tricky question can lead to confusion due to the confusion generated question These types of questions are very specific to the areas in which people's knowledge or behavior is evaluated Generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality However they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying I know In this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations **The 2020-21 Eruption of La Soufrière Volcano, St Vincent** R.E.A. Robertson, E.P. Joseph, J. Barclay, R.S.J. Sparks, 2024-01-03

Volcanic eruptions are complex and inherently uncertain making the management of a potentially explosive eruption on a small island with limited resources extremely difficult This volume presents scientific findings from the 2020-21 eruption of La Soufrière Volcano on the island of St Vincent in the Eastern Caribbean This involved three months of effusive activity that escalated rapidly to 13 days of explosive activity beginning with an intense two days of near continuous ash venting and explosions The book contains an introduction and 17 papers split into two parts the first presents geological and volcanological advances whereas the second documents and analyses the impacts of the eruption and the challenges presented for the management of the volcanic crisis This volume represents both significant contributions to the knowledge of the Soufrière eruptive system and important insights into the ways and means by which volcanic eruptions of this type

impact on populations at risk It also provides detailed insights into the most effective communication processes through this type of crisis
