 Poverty in Mind What Being Poor Does to Kids Brains and What Schools Can Do About It veteran educator and brain expert
 Eric Jensen takes an unflinching look at how poverty hurts children families and communities across the United States and
 demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students

 ability to adapt from experience means that poor children can also experience emotional social and academic success A brain
 that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich balanced learning
 environments and caring relationships that build students resilience self esteem and character Drawing from research
 experience and real school success stories Teaching with Poverty in Mind reveals What poverty is and how it affects students
 in school What drives change both at the macro level within schools and districts and at the micro level inside a student s
