O'Connor,2009-01-16 Turning Average Instruction into Great Instruction details a clear and concise approach to school improvement focusing school leaders on the critical factor that has the greatest impact on student achievement _classroom instruction Decades of research demonstrate that what happens between teachers and students in our nation s classrooms has the greatest impact on how well those students learn The current trend in school reform is to tackle all aspects of a school in order to improve student achievement forcing school leaders to attempt to focus on the school culture use of materials community relations teachers pre service training the school s physical design classroom decorations and instruction Unfortunately such a wide scope leads to a lack of focus among school staff With his singular focus on classroom instruction what O Connor suggests is an antithesis to that approach School leaders will develop a common understanding of the high impact instructional components that should be seen in every classroom O Connor maps out how school leaders can align all personnel to systematically build training support and monitoring mechanisms that ensure that effective instruction becomes part of every classroom routine **Exemplary Science in Grades 9-12** Robert Eugene Yager,2005 Essay titles
