Chapter 1

Business Decisions and Financial Accounting

ANSWERS TO QUESTIONS

1. Accounting is a system of analyzing, recording, and summarizing the results of a business's activities and then reporting them to decision makers.
2. An advantage of operating as a sole proprietorship, rather than a corporation, is that it is easy to establish. Another advantage is that income from a sole proprietorship is taxed only once in the hands of the individual proprietor (income from a corporation is taxed in the corporation and then again in the hands of the individual shareholder). A disadvantage of operating as a sole proprietorship, rather than a corporation, is that the individual proprietor can be held responsible for the debts of the business.
3. Financial accounting focuses on preparing and using the financial statements that are made available to owners and external users such as customers, creditors, and potential investors who are interested in reading them. Managerial accounting focuses on other accounting reports that are not released to the general public, but instead are prepared for internal decision making and used by employees, supervisors, and managers who run the company.
4. Financial reports are used by both internal and external groups and individuals. The internal groups are comprised of the various managers of the business. The external groups include investors, creditors, governmental agencies, other interested parties, and the public at large.
5. The business itself, not the individual stockholders who own the business, is viewed as owning the assets and owing the liabilities on its balance sheet. A business's balance sheet includes the assets, liabilities, and stockholders' equity of only that business and not the personal assets, liabilities, and equity of the stockholders. The financial statements of a company show the results of the business activities of only that company.
