Spanish 2 Projects:

The Childes Project Brian MacWhinney, 2014-01-09 Volume I is the first of two volumes that document the three components of the CHILDES Project. It is divided into two parts which provide an introduction to the use of computational tools for studying language learning. The first part is the CHAT manual which describes the conventions and principles of CHAT transcription and recommends specific methods for data collection and digitization. The second part is the CLAN manual which describes the uses of the editor SONIC CHAT and the various analytic commands. The book will be useful for both novice and experienced users of the CHILDES tools as well as instructors and students working with transcripts of child language. Volume II describes in detail all of the corpora included in the CHILDES database. The conversational interactions in the corpora come from monolingual children and their caregivers and siblings as well as bilingual children, older school-aged children, adult second language learners, children with various types of language disabilities, and aphasic recovering from language loss. The database includes transcripts in 26 different languages.

Project-Based Learning in Second Language Acquisition Adrian Gras-Velazquez, 2019-07-25. This book showcases pedagogical tools for learning languages through interdisciplinary project-based learning (PBL). Chapters demonstrate a diverse range of PBL activities that help students build communities of practice within classroom settings and across local and global communities. Too often learning a language can become a static endeavor confined to a classroom and a singular discipline. But language is dynamic and fluid no matter the setting in which learning takes place. In acknowledging this, this volume explores how PBL and community engagement pedagogies serve to combine learning goals and community service in ways that enhance student growth and facilitate second language development in an interdisciplinary multilingual and multicultural higher education learning environment. Chapters touch on activities and approaches including spoken word poetry, environmental projects, social activism, study abroad, and in-service learning. This book will be of interest to researchers, academics, and postgraduate students in the fields of language education, second language acquisition, higher education, and comparative and international education.
