Bruns,2005 Poetry is philosophically interesting writes Gerald L Bruns when it is innovative not just in its practices but before everything else in its poetics that is in its concepts or theories of itself In The Material of Poetry Bruns considers the possibility that anything under certain conditions may be made to count as a poem By spelling out such enabling conditions he gives us an engaging overview of some of the kinds of contemporary poetry that challenge our notions of what language is sound poetry visual or concrete poetry and found poetry Poetry s sense and meaning can hide in the spaces in which it is written and read says Bruns and so he urges us to become anthropologists to go afield in poetry s social historical and cultural settings From that perspective Bruns draws on works by such varied poets as Gertrude Stein Ezra Pound Steve McCaffery and Francis Ponge to argue for three seemingly competing points First poetry is made of language but is not a use of it That is poetry is made of words but not of what we use words to produce concepts narratives expressions of feeling and so on Second as the nine sound poems on the CD included with the book demonstrate poetry is not necessarily made of words but is rooted in and in fact already fully formed by sounds the human body can produce Finally poetry belongs to the world alongside ordinary things it cannot be confined to some aesthetic neutral or disengaged dimension of human culture Poetry without frontiers unmoored from expectations and sometimes even written in imaginary languages Bruns shows us why for the sake of all poetry we should embrace its anarchic vitalizing ways **The English Illustrated Magazine: "The Gift of the Sea"** ,1912 **The Long Ascent, Volume 2** Robert Sheldon,2019-09-23 The first eleven chapters of Genesis Adam Eve Noah are to the twenty first century what the virgin birth was to the nineteenth century an impossibility A technical scientific exegesis of Genesis 1 11 however reveals not only the lost rivers of Eden and the garden s location but the date of the flood the length of the Genesis days and the importance of comets in the creation of the world These were hidden in the Hebrew text now illuminated by modern cosmology archaeology and biology The internet friendly linguistic tools described in this book make it possible to resolve the location the extent and the destruction of Eden and Noah s flood Ancient Egyptian Greek Norse Sumerian and Sanskrit mythology are all found to support this new interpretation of Genesis Combining science myth and the Genesis accounts paints a vivid picture of the genetic causes and consequences of the

greatest flood of the human race It also draws attention to the acute peril our present civilization faces as it follows the same path as its long forgotten antediluvian ancestors Discover why Genesis has never been so possible so relevant as it is today
