The World Health Report 2007:

The World Health Report 2007 World Health Organization, 2007 World Health Report 2007 discusses the challenges to global health security by the increasing and constant movement around the world of people and products. It looks at the potential of new tools for collective defence particularly the revised International Health Regulations 2005 which came into force this year. Significantly the revised Regulations move away from a focus on passive barriers at airports, seaports and borders to a strategy of proactive risk management detecting an event early and stopping it at its source before it has a chance to become an international threat. *The World Health Report 2008* World Health Organization, 2008 Provides information on medical care and health care policy from around the world. The New Public Health Theodore H. Tulchinsky, Elena A. Varavikova, 2009 Linking classical public health and intervention with evolving healthcare strategies and policies for the 21st century. The New Public Health provides a broad perspective on current issues, the kinds of solutions, expectations needed in the future. **World Health Statistics 2009** World Health Organization, 2009 World Health Statistics 2009 contains WHO's annual compilation of data from its 193 member states and includes a summary of progress towards the health-related millennium development goals and targets. This edition also contains a new section on reported cases of selected infectious diseases. It provides a comprehensive summary of the current status of national health and health systems including mortality and burden of disease, causes of death, reported infectious diseases, health service coverage, risk factors, health systems resources, health expenditures, inequities and demographic and socioeconomic statistics. The section on inequities presents statistics on the distribution of selected health outcomes and interventions within countries, disaggregated by sex, age, urban and rural settings, wealth and educational level. WHO presents World Health Statistics 2009 as an integral part of its ongoing effort to inform better measures of population health and national health systems. The Right to Health Brigit Toebe, Rhonda Ferguson, Milan M. Markovic, Obiajulu Nnamuchi, 2014-09-05 This interdisciplinary study engages with the fields of human rights law, health law and public health. It analyses how the internationally guaranteed human right to health is realized by States at a national level. It brings together scholars from more than ten different countries with each of them analyzing the right to health in their country or region. They all focus on a particular theme that is important in their country such as health inequalities, the Millennium Development Goals or the privatization of healthcare. This book is relevant for scholars, practitioners and policy makers in the field of human rights law, health law, public health and the intersection between these three fields. **Routledge Handbook of Global Health Security** Simon Rushton, Jeremy Youde, 2014-08-07 This new Handbook presents an overview of cutting edge research in the growing field of global health security. Globalization, Difference, and Human Security Mustapha Kamal Pasha, 2013-10-23

Globalization Difference and Human Security seeks to advance critical human security studies by re framing the concept of human security in terms of the thematic of difference Drawing together a wide range of contributors the volume is framed among others around the following key questions What are the silences and erasures of advancing a critical human security alternative without making recognition of difference its central plank How do we rethink the complex interplay of human security and difference in distinct and varied spatial and cultural settings produced by global forces What is the nexus between human security and the broader field of global development What new challenges to Human Security and International Relations are produced with the rise of the post liberal or post secular subject In what ways releasing human security from identification with the territorial state helps reconceptualize culture How does Human Security serve as a subspecies of modern humanitarian thought or the latter reinforce imperial imaginaries and the structures of order and morality Is the pursuit of indigenous rights fundamentally counterpoised to the pursuit of human security What difference it might make to take the doings and beings of communities of subsistence rather than basic needs wealth seeking individuals as a point of departure in critical human security studies How does reconstruction bind post war and post disaster states and societies into the global capitalist democratic political structure
