The Skeptic's Handbook Marc Bradley Berlin,2012-09 Some people are skeptical about religion Others about politics And still others about romance But what about those who sniff out pure BS on just about everything Now they have the only resource they ll ever need to guide them through an irreverent look at the big questions that have intrigued all of mankind for centuries thought provoking inquiries from What s the Worst Country in the World to Can I Predict When I Will Die and everything in between The Skeptic s Handbook pulls no punches and no topic is off limits But rather than offend it simply makes you laugh as you realize that ultimately the dumbest thing we can do is to take life too seriously Why miss out on the absurdity of it all when that can be such a big part of the fun Filled with one page reflections each designed to answer a profound question such as Are There Any Jews in Mongolia this indispensable resource will leave you marveling at the foolish nonsense of a world that somehow manages to function despite the often bizarre machinations of a species known as homo sapiens Laughter really

A Skeptic's Guide to the Mind Robert A. Burton, 2013-04-23 In this scientific study a neurologist presents a critical startling and expansive journey into the mysteries of the brain and what makes us human What if our soundest most reasonable judgments are beyond our control Despite 2500 years of contemplation by the world s greatest minds and the more recent phenomenal advances in basic neuroscience neither neuroscientists nor philosophers have a decent understanding of what the mind is or how it works The gap between what the brain does and the mind experiences remains uncharted territory Nevertheless with powerful new tools such as the fMRI scan neuroscience has become the de facto mode of explanation of behavior Neuroscientists tell us why we prefer Coke to Pepsi and the media trumpets headlines such as Possible site of free will found in brain Or Bad behavior down to genes not poor parenting Robert Burton believes that while some neuroscience observations are real advances others are overreaching unwarranted wrong headed self serving or just plain ridiculous and often with the potential for catastrophic personal and social consequences In *A Skeptic's Guide to the Mind* he brings together clinical observations practical thought experiments personal anecdotes and cutting edge neuroscience to decipher what neuroscience can tell us and where it falls woefully short At the same time he offers a new vision of how to think about what the mind might be and how it works With a rich tapestry of neurological case studies allusions to film and literature compelling personal stories and challenging thought experiments Burton describes the abundant philosophical and scientific challenges to the belief that we know or even that we can know our own minds New York Times bestselling author Daniel Simons

A Skeptic's Guide to Writers' Houses Anne Trubek, 2011-07-11 There are many ways to show our devotion to an author besides reading his or her works Graves make for popular pilgrimage sites but far more popular are writers house museums What is it we hope to accomplish by trekking to the home of a dead author We may go in search of the point of inspiration eager to stand on the very spot where our favorite literary characters first came to life and find ourselves instead in the house where the author himself was conceived or where

she drew her last breath Perhaps it is a place through which our writer passed only briefly or maybe it really was a longtime home now thoroughly remade as a decorator s show house In A Skeptic s Guide to Writers Houses Anne Trubek takes a vexed often funny and always thoughtful tour of a goodly number of house museums across the nation In Key West she visits the shamelessly ersatz shrine to a hard living Ernest Hemingway while meditating on his lost Cuban farm and the sterile Idaho house in which he committed suicide In Hannibal Missouri she walks the fuzzy line between fact and fiction as she visits the home of the young Samuel Clemens and the purported haunts of Tom Sawyer Becky Thatcher and Injun Joe She hits literary pay dirt in Concord Massachusetts the nineteenth century mecca that gave home to Hawthorne Emerson and Thoreau and yet could not accommodate a surprisingly complex Louisa May Alcott She takes us along the trail of residences that Edgar Allan Poe left behind in the wake of his many failures and to the burned out shell of a California house with which Jack London staked his claim on posterity In Dayton Ohio a charismatic guide brings Paul Laurence Dunbar to compelling life for those few visitors willing to listen in Cleveland Trubek finds a moving remembrance of Charles Chesnutt in a house that no longer stands Why is it that we visit writers houses Although admittedly skeptical about the stories these buildings tell us about their former inhabitants Anne Trubek carries us along as she falls at least a little bit in love with each stop on her itinerary and finds in each some truth about literature history and contemporary America
