Mathematical Circles Sergei Aleksandrovich Genkin, Dmitrii Vladimirovich Fomin, What kind of book is this It is a book produced by a remarkable cultural circumstance in the former Soviet Union which fostered the creation of groups of students teachers and mathematicians called mathematical circles The work is predicated on the idea that studying mathematics can generate the same enthusiasm as playing a team sport without necessarily being competitive This book is intended for both students and teachers who love mathematics and want to study its various branches beyond the limits of school curriculum

Cytochrome Complexes: Evolution, Structures, Energy Transduction, and Signaling William A. Cramer, Toivo

Kallas, 2016-06-14 An Introduction that describes the origin of cytochrome notation also connects to the history of the field focusing on research in England in the pre World War II era The start of the modern era of studies on structure function of cytochromes and energy transducing membrane proteins was marked by the 1988 Nobel Prize in Chemistry given to J Deisenhofer H Michel and R Huber for determination of the crystal structure of the bacterial photosynthetic reaction center An ab initio logic of presentation in the book discusses the evolution of cytochromes and hemes followed by theoretical perspectives on electron transfer in proteins and specifically in cytochromes There is an extensive description of the molecular structures of cytochromes and cytochrome complexes from eukaryotic and prokaryotic sources bacterial plant and animal The presentation of atomic structure information has a major role in these discussions and makes an important contribution to the broad field of membrane protein structure function
