Abstract

Student housing is an entity in housing studies which researchers relegated to the background, this may not be unconnected to the fact that it has relative less problems in terms of financing, substandard quality and provision of infrastructure facilities and services since institutions' has taken complete responsibility of everything. However, in the last few decades, enrolment in higher education institutions has been precipitously exceeding the limited institutions student housing which generates striking demand in the private housing rental market which stunned scholars in student housing studies. Students living in the private sector properties were said to have faced more challenges than those living in hall of resident therefore, advantages and the nature of these challenges were discuss in this paper.

Keywords: Student housing, on-campus, off-campus, higher education institution (HEI)

1. Introduction

Housing is a multi-faceted field of study with diverse areas of interests. Some scholars dwell on housing finance, some on demand and supply, housing delivery, quality, formation, market, satisfaction and so on. Generally many researchers have been focusing on either urban or rural housing shortage, substandard quality, low level facilities and services, financing and of recent some are studying institutional housing, students housing inclusive. This may not be unconnected with the less problems faced by the institutional housing more especially in terms of provision, financing and management, because institutions' take full charge of everything.

Housing in it multi-faceted dimensions, is one of the important basic need of an individual, family and any given society. Being students are special group of people with a common interest; they are also special consumers of housing like any other special areas or institutions. Such speciality or institutions include school dormitories, military and police barracks, care homes, hospitals, prison and camps. Their housing environment is unique that shows the type of activity performs in such areas and their specific requirements also are unique that differentiate them with other housing environment.

2. A Review of Housing Concept

Indeed many scholars converged on the idea that housing is a basic necessity to mankind in life and is second to none but food, health and clothing. In other words, man seeks protection from the environmental elements only after being satisfied the need for food and clothing. Therefore, it can be regarded as one of the basic needs of man as many scholars are of the opinion that housing is one of the most important necessities of life. 'Fundamental right', it is a priority for the attainment of living standard and it is the core to the man-environmental interaction, an agent of security that lead to happy, productive and fulfilling lives' be it rural or urban (Ademiluyi & Raji, 2008; Jiboye, 2010; Yuseff, 2011 & Cagamas Holdings, 2013). In all these, one will understand the importance of house to man and without it man cannot feel secured against physical elements and will be unable to lead happy, productive, fulfilling lives and attaining high living standards. Therefore, students like any other human being, housing is their fundamental need and securing good, safe and affordable housing will lead to run happy life, attaining high living standards, intellectually creative and have rewarding better life.

Housing in the modern time should be more than a mere structure, permanent or make shift, designed basically for shelter to protect the occupant against the unwanted external elements and intruders. Housing should take up all the social services and utilities that make individual, neighbourhood or community a habitable environment. Further to this perspective Sekar, (1991) opined, in the contemporary time, housing should have some basic infrastructure facilities like clean water supply, sanitary facilities, kitchen, drainage, electricity, access road and basic services to be consider a house. In like manner, many scholars agreed housing in the contemporary period should be seen beyond shelter and should consist of other essential facilities like water supply, electricity,
