Religion Seth Daniel Kunin, 2003 Over the course of the twentieth century the way we understand the religious experience has been transformed Various thinkers and intellectual approaches have shaped the ways in which scholars examine rituals symbols and belief systems In **Religion, Theory, Critique** Richard King, 2017-07-18 Religion Theory Critique is an essential tool for learning about theory and method in the study of religion Leading experts engage with contemporary and classical theories as well as non Western cultural contexts Unlike other collections this anthology emphasizes the dynamic relationship between religion as an object of study and different methodological approaches and openly addresses the question of the manifold ways in which religion secular and culture are imagined within different disciplinary horizons This volume is the first textbook which seeks to engage discussion of classical approaches with contemporary cultural and critical theories Contributors write on the influence of the natural sciences in the study of religion the role of European Christianity in modeling theories of religion religious experience and the interface with cognitive science the structure and function of religious language the social scientific study of religion ritual in religion the phenomenology of religion critical theory and religion embodiment and religion the impact of colonialism and modernity theorizing religion in terms of race and ethnicity links among religion nationalism and globalization the interplay of gender sex and religion and religion and the environment Each chapter introduces the topic identifies key theorists and issues and respects the pluralistic nature of the scholarship in the field Altogether this collection scrutinizes the explicit and implicit assumptions theorists make about religion as an object of analysis

Religion James Thrower, 1999 Why theories of religion After raising and answering this question the author begins his examination of theories of religion by first looking at the explanations given by religious believers Revelation and Religious experience He then considers the view of thinkers who have sought to transform religion into philosophy Plato Kant and Hegel before reviewing the theories of those who have seen religion as arising out of errors in primitive thinking Tyler Frazer and Levy Bruhl and those masters of suspicion as Paul Ricoeur has called them Feuerbach Nietzsche Marx and Freud who offered what they believed to be exhaustive psychological and sociological theories of the origin and nature of religion publisher's description *Being Religious* Mladen Turk, 2013-07-12 What makes us religious What is religion This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion In *Being Religious* Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup Our religious behaviors can influence our relationship towards each other and towards

our environment in significant ways He shows how some aspects of complex religious behaviors can be understood better in light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize

Psychological Theories of Religion James Forsyth, 2003. This book surveys the major theorists in the psychology of religion: Sigmund Freud, C. G. Jung, William James, Erich Fromm, Gordon Allport, Abraham Maslow, and Viktor Frankl, who are all seminal thinkers and represent the classical theories in this field. Each of these theorists presents a more or less comprehensive theory of religion which attempts to give an account of the psychological origin and/or value of religion. The approach of the book in each case shows how the theory of religion emerges not only from the theorist's psychological theory but also from his own life experience. Each chapter contains an introductory overview of the theory, biographical material on the theorist, his theory of personality, his theory of religion, and an evaluation of the theory of religion. This consistent chapter format discusses the theorist's influence on the field, points out some developments from and reactions to the theory, and raises certain questions in order to stimulate readers' own critical responses. For individuals who want to view and better understand religion from the psychological perspective.
