Chapters include further reading and discussion questions. The book is supported by a companion website with online links, annotated bibliography, glossary, white papers, and additional case studies together with projects, research problems, and group activities, all of which focus on real world problem solving of sustainability issues. Theological Ethics through a Multispecies Lens Celia E. Deane-Drummond, 2019-11-05

There are two driving questions informing this book. The first is where does our moral life come from? It presupposes that considering morality broadly is inadequate. Instead, different aspects need to be teased apart. It is not sufficient to assume that different virtues are bolted onto a vicious animality red in tooth and claw. Nature and culture have interlaced histories. By weaving in evolutionary theories and debates on the evolution of compassion, justice, and wisdom, it shows a richer account of who we are as moral agents. The second driving question concerns our relationships with animals. Deane Drummond argues for a complex, community-based multispecies approach. Hence, rather than extending rights, a more radical approach is a holistic multispecies framework for moral action. This need not weaken individual responsibility. She intends not to develop a manual of practice but rather to build towards an alternative, philosophically informed approach to theological ethics, including animal ethics. The theological thread weaving through this account is wisdom. Wisdom has many different levels and in the broadest sense is connected with the flow of life, understood in its interconnectedness and sociality. It is profoundly theological and practical. In naming the project the evolution of wisdom, Deane Drummond makes a statement about where wisdom may have come from and its future orientation. But justice, compassion, and conscience are not far behind, especially in so far as they are relevant to both individual decision making and institutions.
