

Drawing Conclusions

A conclusion is a judgement or decision about a character, setting, or event that is reached by reviewing all the available information. Good readers draw conclusions as they read to help them understand the story.

Drawing conclusions and making inferences are both part of the problem solving process. While they are similar, they aren't exactly the same thing.

How to Draw Conclusions

1	The first step to drawing a conclusion requires the reader to review all the information stated in the text about a person, setting, or event.
2	The next step is for the reader to consider any facts or details that are inferred, but not stated.
3	Once the reader has all the information available, he/she should analyze it and consider what the next logical step or assumption would be for the given situation.
4	The reader comes up with a conclusion. He or she will determine the next logical steps or assumptions based on the information available.
