South African Metro Police 2014 Application Form:

Police Work and Identity Andrew Faull, 2017-09-07 This is a book about the men and women who police contemporary South Africa Drawing on rich original ethnographical data it considers how officers make sense of their jobs and how they find meaning in their duties It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo liberalising regimes such as South Africa can be traced to the day to day experiences and ambitions of the average police officer It is about the stories they tell themselves about themselves and their social worlds and how these shape the order they produce through their work By focusing on police officers this book positions the individual in primacy over the organisation asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts It acknowledges but downplays the importance of police culture in determining officers attitudes and behaviour and reminds readers that most officers lives are entangled in and shaped by a range of social political and cultural forces It suggests that a job in the South African Police Service SAPS is primarily just that a job Most officers join the organisation after other dreams have slipped beyond reach their presence in the Service being almost accidental But once employed they re write their self narratives and enact carefully choreographed performances to ease managerial and public pressure and to rationalize their coercive practices In an era where evidence and what works reigns supreme and where cop culture is often deemed a primary socializing force this book emphasises how officers personal histories ambitions and vulnerabilities remain central to how policing unfolds on the street

Urban Informality in South Africa and Zimbabwe Inocent Moyo, Trynos Gumbo, 2021-01-09 This book adds to the research of urban informality in the Global South with a specific focus on South Africa and Zimbabwe It addresses the agency and the potential transformative capacity of the phenomenon of urban informality in connection with Southern African cities and towns It adopts a political economy approach to analyse the evolution of informality in cities and its implications for urban planning It brings to bear how the South African and Zimbabwean historical and or ideological and contemporary political and economic trajectories have impacted on the ever changing nature of urban informality both spatially and structurally and or compositionally thus resulting in unique urban materialities which are aspects that have scarcely been studied or discussed in the extant literature This book therefore seeks to close the academic gap by dealing with the dearth of literature on spatial re locational discourses of urban informality The work positions urban informality as a resilient force with potency in terms of political mobilisation and re shaping urban spaces Though these are fundamental issues they have received comparatively little attention especially in literature that focuses on the Southern African region Accordingly undergraduate and post graduate students as well as academics in the fields of Urban Geography Political Science Development Studies Sociology Town and Regional Planning among others will find the range of topics and depth of coverage in this book particularly valuable Similarly practitioners and activists on issues of urban informality and urban governance will find the book very useful

Land-Use Management to Support Sustainable Settlements in South Africa Verna Nel, Stuart Paul Denoon-Stevens, 2023-10-24. This book provides a theoretical and practical foundation needed to change the practice of land use management in Southern Africa. It presents an overview of an alternative land use management system for South African municipalities that is economically, socially and environmentally more sustainable than many of the land use schemes in effect at present. Land use management is a component of spatial governance that controls the nature and extent of development to prevent harmful impacts on people and the environment. As the current system with its colonial modernist planning and regulatory mechanisms were never designed to deal with rapid change, urbanisation and informality, a different form of land development and land use management is necessary. This timely book reflects the culmination of many years of practical experience and research into various aspects of land use management by the authors and studies undertaken by their master's and doctoral students. The book goes beyond an analysis of the problems and suggests concrete proposals that can be applied throughout Southern Africa based on a rural to urban transect. This book is directed to a broad range of readers interested in spatial planning and land use management. It will be of interest to those in the fields of geography, urban studies, urban design, planning and architecture.

Biometric State Keith Breckenridge, 2014-10-02. Biometric identification and registration systems are being proposed by governments and businesses across the world. Surprisingly, they are under most rapid and systematic development in countries in Africa and Asia. In this groundbreaking book, Keith Breckenridge traces how the origins of the systems being developed in places like India, Mexico, Nigeria and Ghana can be found in a century-long history of biometric government in South Africa with the South African experience of centralized fingerprint identification unparalleled in its chronological depth and demographic scope. He shows how empire and particularly the triangular relationship between India, the Witwatersrand and Britain established the special South African obsession with biometric government and shaped the international politics that developed around it for the length of the
