New to the LSP classroom? A selection of monographs on successful practices Martina Vránová, 2023-05-23 As Languages for Specific Purposes have always been defined as student oriented the rationale behind this volume is to use the rather neglected niche of the other necessary agent of language instruction and thus focus on the LSP practitioner This turn towards the instructor has been motivated by the fact that a great number of LSP practitioners enter their jobs without previous expertise They lack LSP education or they may not even have a background in applied linguistics This motivation has proven valid as many of the volume s contributors have faced this particular situation in their professional lives For insights into the LSP field and guidelines on the best practices they must rely on their colleagues who offer to share their experience through workshops conferences or papers which is what this volume provides The primary goal of this volume is to present considerations of what challenges LSP practitioners face and should be prepared for in their jobs and to provide practice tested methodological guidelines on such demanding teaching techniques as blended and flipped

learning or tandem learning All papers have been written by LSP practitioners and researchers in higher education Thus this volume provides both guidance and self reflection In other words it is written by experienced LSP practitioners for aspiring LSP practitioners about how they see themselves and what effort they make to meet the challenges of their jobs As proof that LSP practice is a global challenge papers have been collected from many European countries the USA Uruguay Even though most papers are naturally concerned with English being the lingua franca of today the collection also features guidelines for teaching Spanish French and Dutch for specific purposes Moreover the target disciplines these languages are taught for encompass business engineering sociology or medicine thus supporting the assumption of the universal character of problems LSP practitioners deal with

Graduate Students Becoming Qualitative Researchers Char Ullman,Kate Mangelsdorf,Jair Muñoz,2020-11-23

Through conducting an ethnographic study about doctoral students from traditionally underrepresented groups who are learning to conduct ethnographic research this volume offers unique insight into the challenges and experiences through which these students develop their skills and identities as qualitative researchers. Foregrounding the stories and perspectives of students from minority backgrounds including Latinx, Black, differently abled, and queer students, *Graduate Students Becoming Qualitative Researchers* identifies how the process of learning to conduct ethnographic research underpins doctoral students' success, confidence, and persistence in the academy. Chapters follow students during a one-year ethnographic research course during which they learn about ethnography and also conduct observations, write field notes, interview participants, and gather artifacts. Offering important pedagogical insights into how ethnography and academic writing are communicated, the text also tackles questions of access and diversity within scholarship and highlights barriers to first-generation and minoritized students' success, including impostor syndrome, stereotype vulnerability, and access to time, knowledge, and capital. This volume will prove valuable to doctoral students, postgraduate researchers, scholars, and educators conducting qualitative research across the fields of education and rhetoric, as well as the humanities and social sciences. It will also appeal to those interested in multiculturalism and diversity within the education sector.

The First Year of Teaching Jabari Mahiri, Sarah Warshawer Freedman, 2014-05-09 For first-year teachers entering the nation's urban schools, the task of establishing a strong and successful practice is often extremely challenging. In this compelling look at first-year teachers' practice in urban schools, editors Jabari Mahiri and Sarah Warshawer Freedman demonstrate how a program of systematic classroom research by teachers themselves enables them to effectively target instruction and improve their own practice. The book organizes the teachers' research into three broad areas corresponding to issues the new teachers identified as the most challenging. *The First Year of Teaching* offers an array of classroom scenarios that will spark in-depth discussions in teacher preparation classes and professional development workshops, particularly in the context of problem-based, problem-posing pedagogies.

Genders, Cultures, and Literacies Barbara J. Guzzetti, 2021-11-29 This volume brings together leading scholars in their fields who offer much-needed and wide-ranging perspectives on the intersections of genders, cultures, and literacies. As incidents of racial and gender aggression grow in number and in global attention, it is essential to understand how racial and gender identities and their expressions interplay and influence literacy development and practice. Contributors examine how social identities intersect and are expressed in literacy practices across an array of school and out-of-school settings and discuss how gender and race are represented in individuals' multimodal practices. Chapters address such topics as the literacy practices of incarcerated fathers of color, Black girls' literacies, Indigenous students' cultural literacies, the writing practices of Latinx women for identity representation, and more. Ideal for scholars in literacy studies, gender studies, and cultural studies, this volume is a necessary and original update to the ways cultural, racial, and gender identities are viewed in current educational and sociocultural climates.
