Things To Make And Do In The Fourth Dimension:

Things to Make and Do in the Fourth Dimension Matt Parker, 2014-12-02 A book from the stand up mathematician that makes math fun again Math is boring says the mathematician and comedian Matt Parker Part of the problem may be the way the subject is taught but it s also true that we all to a greater or lesser extent find math difficult and counterintuitive This counterintuitiveness is actually part of the point argues Parker the extraordinary thing about math is that it allows us to access logic and ideas beyond what our brains can instinctively do through its logical tools we are able to reach beyond our innate abilities and grasp more and more abstract concepts In the absorbing and exhilarating Things to Make and Do in the Fourth Dimension Parker sets out to convince his readers to revisit the very math that put them off the subject as fourteen year olds Starting with the foundations of math familiar from school numbers geometry and algebra he reveals how it is possible to climb all the way up to the topology and to four dimensional shapes and from there to infinity and slightly beyond Both playful and sophisticated Things to Make and Do in the Fourth Dimension is filled with captivating games and puzzles a buffet of optional hands on activities that entices us to take pleasure in math that is normally only available to those studying at a university level Things to Make and Do in the Fourth Dimension invites us to re learn much of what we missed in school and this time to be utterly enthralled by it

A Theory of the Mechanism of Survival: The Fourth Dimension and Its Applications W. Whately Smith, 2022-07-21 W Whately Smith s A Theory of the Mechanism of Survival The Fourth Dimension and Its Applications offers a thought provoking exploration of the integration between the established geometrical understanding of dimensions and the mystical realm of psychical research Employing a concise and accessible narrative style Smith elucidates the basic principles of flatland a metaphor for two dimensional space and extrapolates the possibility of a fourth spatial dimension beyond our current perceptual limitations This ambitious text situates itself within the literary tradition that marries scientific inquiry with speculative thought as it postulates a fundamental hypothesis necessary for explaining phenomena that lie at the fringes of empirical research and human comprehension W Whately Smith s background might reveal a profound fascination with both the empirical and the metaphysical leading to his unique interdisciplinary approach His erudition likely informs his endeavor to construct a conceptual bridge between the tangible world and the enigmatic concept of survival after death This book may reflect a synthesis of his deep understanding of dimensional theory and avid interest in expanding the horizons of conventional science through speculative and theoretical frameworks A Theory of the Mechanism of Survival The Fourth Dimension and Its Applications is recommended for readers who are drawn to the intersection of geometry physics and the paranormal It caters to those who appreciate not only rigorous thought experiments but also the contemplation of existential mysteries W Whately Smith invites scholars students and intellectually curious individuals alike to delve into a hypothesis that could potentially redefine the boundaries of our understanding of reality and our place within it

Evolution in Four Dimensions, revised edition Eva Jablonka, Marion J. Lamb, 2014-04-11 Now updated

with the latest research this pioneering accessible study argues for a more complex view of evolution proposing there is more to heredity than just genes In this revised edition the widely read *Evolution in Four Dimensions* Eva Jablonka and Marion Lamb propose that there are four dimensions in heredity These four inheritance systems play a role in evolution which they argue can all provide variations upon which natural selection can act Genetic Epigenetic or non DNA cellular transmission of traits Behavioral Symbolic transmission through language and other forms of symbolic communication Jablonka and Lamb present a richer more complex view of evolution than that offered by the gene based Modern Synthesis arguing that induced and acquired changes also play a role Their lucid and accessible text is accompanied by lively drawings and each chapter ends with a dialogue in which the authors refine their arguments against the vigorous skepticism of the fictional I M for Ipcha Mistabra Aramaic for the opposite conjecture This revised edition reflects the spate of new discoveries in biology since the book was first published offering corrections an updated bibliography and a substantial new chapter on each of the four dimensions with special attention to the epigenetic where there has been an explosion of new research

AND SPIRIT SEE ALSO VOLUME 2 MEDITATION VOLUME 3 SPIRITUAL HAPPINESS Unequal Eugenia Cheng, 2025-09-02 Why the familiar equal sign isn't just a marker of sameness but a gateway into math's and humanity's most profound questions Math is famous for its equations $1 + 2 = a + b = 2 + c = 2$ or $y = mx + b$ Much of the time it can seem like that's all mathematics is following steps to show that what's on one side of an equation is the same as what's on the other In Unequal Eugenia Cheng shows that's just part of the story and the boring part to boot Mathematics isn't only about showing how numbers and symbols are the same It isn't even just about numbers and symbols at all but a world of shapes symmetries logical ideas and more And in that world the boundary between things being equal and unequal is a gray area or perhaps a rainbow of beautiful vibrant subtly nuanced color As Unequal shows once you go over that rainbow almost everything can be considered equal and unequal at the same time whether it's shapes seen from the right perspective a circle is the same as an ellipse words synonyms or people even numbers It all depends on what features we care about And it's up to us what we do about it That's because mathematics isn't a series of rules facts or answers It's an invitation to a more powerful way of thinking LEGO and Philosophy Roy T.
