Chapter 18

Exercise 18.1 Collecting and analysing data on species richness and species diversity

- 1 a Use a line transect or belt transect. You could run a tape from the lower shore to the upper shore, and either record every individual seaweed touching the tape along its whole length, or place quadrats (either touching each other, or at regular intervals apart) and record the abundance of the different seaweed species in each quadrat.
- b Use frame quadrats, placed randomly within each area, using random numbers as the coordinates of axes placed along two edges of the defined area. The size of the quadrat, and the number of quadrats used, should be identical in each area. A quadrat with 0.5 metre sides is likely to be suitable. You could then use an abundance scale (such as the Braun-Blanquet cover scale) or percentage cover to estimate the abundance of each species within each quadrat.

2 a-e

Species	n	n + N	(n + N) ²
A	282	0.230	0.053
B	141	0.115	0.013
C	376	0.307	0.094
D	0		
E	132	0.108	0.0019
F	21	0.017	0.00029
G	210	0.171	0.029
H	63	0.051	0.0026
Total	N = 1225	$\Sigma(n + N)^2 = 0.194$	

$$D = 1 - 0.194 = 0.806$$

f

Species	n	n + N	(n + N) ²
A	310	0.402	0.16
B	103	0.134	0.018
C	292	0.379	0.14
D	49	0.064	0.0041
E	2	0.0026	0.0000067
F	0		
G	14	0.019	0.00036
H	1	0.0013	0.0000016
Total	N = 771	$\Sigma(n + N)^2 = 0.322$	

$$D = 1 - 0.322 = 0.678$$

g Area P has the greater species diversity.

- 3 a estimated population = $(62 \times 73) + 9 = 503$
- b We have to make several assumptions, and we cannot be sure that all of them hold true. For example:
 - We assume that the marked woodlice are equally likely to survive as the unmarked ones. In practice, perhaps the markings made them more visible to predators, so the marked ones are under-represented in the second sample.
 - We assume that the marked woodlice mix perfectly and randomly with the rest of the population. In practice, perhaps the marked ones tended to remain together and did not completely mix into the rest of the population.
 - We assume that there is no bias when we catch the second sample. In practice, the marked ones may be more visible to us, and so we catch more of those than we should.

So You Think You Can Think Otto B. Toews, 2017-10-26 In our complex world, how can we learn to think through moral dilemmas in the pursuit of justice? How do the words we associate with morality impact our understanding and application of it? In short, how can we enact equal measures of fairness among family members, friends, and strangers? These are the troubling questions that guide Dr. Otto Toews as he critically engages with the language of morality and uncovers what is lacking in our conversations about fairness. Using a Principled Thinking Model for resolving everyday moral dilemmas, Toews identifies five basic categories that are necessary for moral thinking: duty, rights, motive, desert, and justice. Combining this research with Nel Noddings' seminal work on caring, Toews concludes that while it is vital that we practice thinking through moral dilemmas, the key to attaining universal justice and fairness lies in our sense of fellow feeling or empathy. Toews argues that without the urgency and energy prompted by a sense of concern for others, thinking through moral dilemmas will remain insufficient in

fostering an ethical world Throughout the book Toews augments his research by providing hypothetical scenarios involving two teachers Bill and Mae They engage in spirited debates over how duty rights motive desert and justice apply to issues such as education cyber bullying mental illness reconciliation and more Again and again Bill and Mae are caught up by the power of empathy demonstrating the urgent need to care for others It is through their dialogues that Toews has designed a brilliant way for us to witness moral thinking in action giving us the language we need to navigate it and preparing us for the countless types of conflicts we encounter every day Literacy and Deafness Lyn Robertson,2013-09-15 There's Not an App for That Simon Robinson,Gary Marsden,Matt Jones,2014-09-14 There s Not an App for That will make your work stand out from the crowd It walks you through mobile experiences and teaches you to evaluate current UX approaches enabling you to think outside of the screen and beyond the conventional You ll review diverse aspects of mobile UX the screens the experience how apps are used and why they re used You ll find special sections on challenging your approach as well as a series of questions you can use to critique and evaluate your own designs Whether the authors are discussing real world products in conjunction with suggested improvements showcasing how existing technologies can be put together in unconventional ways or even evaluating far out mobile experiences of the future you ll find plenty of practical pointers and action items to help you in your day to day work Provides you with new and innovative ways to think about mobile design Includes future mobile interfaces and interactions complete with real world applied information that teaches you how today s mobile services can be improved Illustrates themes from existing systems and apps to show clear paths of thought and development enabling you to better design for the future **Fundamentals of Nursing - E-Book** Patricia A.
