Unreason Kendrick Frazier, Benjamin Radford, 2023-10-17 UNREASON Exploring Pseudoscience Conspiracies and Extraordinary Claims is a collection of forty five of the best articles the legendary Skeptical Inquirer magazine has published in the past decade Featuring articles from writers including Neil deGrasse Tyson on the process of science Richard Dawkins on the standards of truth Elizabeth Loftus on memory Steven Pinker on the notion of progress and many others covering topics from the politicization of science to the frightening rise of misinformation each entry in this collection brings scientific examination to bear in order to ferret out the facts and misconceptions behind popular claims All of the articles within are interesting and readable Yet they are also quite diverse Some articles reinforce and complement each other others as happens in science may voice disagreements or differing perspectives But they all have one thing in common a respect for evidence a demand for the best most well tested most scientifically reliable information Readers will learn Why and how conspiracy rumors start spread and readily gain believers How to stay afloat in a sea of disinformation and survive the age of misinformation Why and how we form beliefs and adhere to them so powerfully How and why memory is fallible and what we can do about it How pseudoexperiments mislead the public about science Unreason will arm readers with scientific knowledge to curb the misinformation and misconceptions that increasingly threaten our civil discourse Even further these essays present a way for us to be better citizens equipped to deal with the winds of misinformation and disinformation swirling about us and better able to look ahead to a world where science and reason indeed just good old common sense can prevail

Life Driven Purpose Dan Barker, 2015-04-01 Every thinking person wants to lead a life of meaning and purpose For thousands of years holy books have told us that such a life is available only through obedience and submission to some higher power Today the faithful keep popular devotionals and tracts within easy reach on bedside tables and mobile devices all communicating this common message Life is meaningless without God In this volume former pastor Dan Barker eloquently powerfully and rationally upends this long held belief Offering words of enrichment

emancipation and inspiration he reminds us how millions of atheists lead happy loving moral and purpose filled lives Practicing what he preaches he also demonstrates through his own personal journey that life is valuable for its own sake that meaning and purpose come not from above but from within

themselves to belief in miracles prophecies and similar magic which orients their view of reality It confines them hindering their ability to consider other possibilities This narrowed lifestyle can be called the prison of belief This book will delight you if you re no longer willing to go along with pabulum babble in ritual blather such as In God we trust so help me God or God bless America TABLE OF CONTENTS DEDICATION PRAISE FOR FREEDOM FROM RELIGION FOREWORD INTRODUCTION THE 30 DAYS FOR FREEDOM FROM RELIGION Day 1 Questions To Guide A REAL Wellness Philosophy and Lifestyle Day 2 Religion and Wellbeing Day 3 Perspectives on Radical Islam and Christian Nationalism Day 4 Doubt A Vital Quality for Effective Decision Making Day 5 Why Catholics Should Consider Leaving the Church Day 6 An Upgrade from 10 Commandments to 10 REAL Commitments Day 7 Use Your Mind and You Will Find Nothing Fails Like Prayer Day 8 The National Day of Prayer Or a National Day of Reason Day 9 Exceptional People the Winter Solstice and Christmas Day 10 Self Evaluation to Estimate Your Experience of Reason Day 11 It s Difficult to be Well but w a Little Bit of Luck You Might Day 12 A REAL Wellness Take on Ethics Day 13 Robert G Ingersoll Day 14 Play An Under Utilized Element in Education and Adult Life Day 15 Self Evaluation of Stress Awareness and Management Day 16 Exuberant Skepticism A Safeguard Against Pleasant Illusions Day 17 Dysfunctional Belief Systems and Anxieties Magical Thinking Day 18 Life Is Meaningless A Liberating REAL Wellness Perspective Day 19 Nothing Is Sacred Day 20 Self Evaluation to Estimate Your Experience of Exuberance Day 21 Sexuality From a REAL Wellness Perspective Day 22 A REAL Perspective on the Satanic Temple Day 23 Real Wellness Or Religion Choose Freedom Not Dogma Day 24 Guiding Children Toward Critical Thinking and Mental Freedom Day 25 Happiness REAL Wellness Perspectives on Enjoying Life Day 26 Reason Based Alternatives To Alcoholics Anonymous Day 27 Which Will Come First The Rapture Or the Demise of Religion Day 28 Celebrate Those Who Promote Reason Science Not Superstition Day 29 How to Die Healthy Day 30 Self Evaluation to Estimate Experience of Personal Freedoms RECOMMENDED READING ACKNOWLEDGEMENTS SPECIAL ACKNOWLEDGEMENT TO EVERYONE LIVING AND DEAD WHOSE WORDS ARE QUOTED IN FREEDOM FROM RELIGION IN 30 DAYS Critical Thinking for Strategic Intelligence Katherine Hibbs Pherson,Randolph H. Pherson,2020-08-14 With Critical Thinking for Strategic Intelligence Katherine Hibbs Pherson and Randolph H Pherson have updated their highly regarded easy to use handbook for developing core critical thinking skills and analytic techniques This indispensable text is framed around 20 key questions that all analysts must ask themselves as they prepare to conduct research generate hypotheses evaluate sources of information draft papers and ultimately present analysis including How do I get started Where is the information I need What is my argument How do I convey my message effectively The Third Edition includes suggested best practices for dealing with digital disinformation politicization and AI Drawing upon their years of teaching and analytic experience Pherson and Pherson provide a useful introduction to skills that are essential within the intelligence community **The HEAD Game** Philip Mudd,2015-03-31 Become a High Efficiency Analytic Decision maker We ve all been there faced with a major decision yet

overwhelmed by the very data that is supposed to help us. It's an all too common struggle in the digital age when Google searches produce a million results in a split second and software programs provide analysis faster than we could ever hope to read it. Adapting the geopolitical and historical lessons gleaned from over two decades in government intelligence, Philip Mudd, an ex-National Security Council staff member and former senior executive at the FBI and the CIA, finally gives us the definitive guidebook for how to approach complex decisions today. Filled with logical yet counterintuitive answers to ordinary and extraordinary problems, whether it be buying a new home or pivoting a failing business model, Mudd's HEAD (High Efficiency Analytic Decision making) methodology provides readers with a battle-tested set of guiding principles that promise to bring order to even the most chaotic problems, all in five practical steps. What's the question? Analysts often believe that questions are self-evident, but focusing on better questions up front always yields better answers later. What are your drivers? The human mind has a hard time juggling information, so analysts need a system to break down complex questions into different characteristics or drivers. How will you measure performance? Once the question has been solidified and the drivers determined, an analyst must decide what metrics they will use to understand how a problem and their solution to it is evolving over time. What about the data? Rather than looking at each bit of information on its own and up front, an analyst can only overcome data overload by plugging data into their driver categories and excising anything that doesn't fit. What are we missing? Complex analysis isn't easy, so it is imperative to assume that the process is flawed while also knowing how to check for possible gaps and errors, such as availability bias, halo effects, and intuitive versus analytic methodologies. Drawing deeply from his own harrowing experiences and mistakes in the line of duty, Mudd has spent years refining and teaching his methodology to Fortune 500 companies and government organizations. Now, in the best-selling tradition of Charles Duhigg's *The Power of Habit* and Oren Klaff's *Pitch Anything*, Philip Mudd's *The HEAD Game* can change the way you both live and work.

50 Popular Beliefs That People Think Are True Guy P. Harrison, 2012-01-03. What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality, asks Neil deGrasse Tyson, science popularizer and author of *Astrophysics for People in a Hurry*. I don't know for sure. But a good place to start would be for everyone on earth to read this book. Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels. Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure. Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon. How do you find a gently persuasive way of steering people away from unfounded beliefs, bogus cures, conspiracy theories, and the like? This down-to-earth, entertaining exploration of commonly held extraordinary claims will help you set the record straight. The author, a veteran journalist, has not only surveyed a vast body of literature but has also interviewed leading scientists, explored the most haunted house in America, frolicked in the inviting waters of the Bermuda Triangle, and even talked to a contrite Roswell alien. He is not out simply to debunk unfounded beliefs. Wherever possible, he presents

alternative scientific explanations which in most cases are even more fascinating than the wildest speculation For example stories about UFOs and alien abductions lack good evidence but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe The proof for Bigfoot or the Loch Ness Monster may be nonexistent but scientists are regularly discovering new species some of which are truly stranger than fiction Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world

Good Thinking Guy P. Harrison, 2015 Critical thinking skills are essential for life in the 21st century In this follow up to his introductory guide *Think* and continuing his trademark of hopeful skepticism Guy Harrison demonstrates in a detailed fashion how to sort through bad ideas unfounded claims and bogus information to drill down to the most salient facts By explaining how the human brain works and outing its most irrational processes this book provides the thinking tools that will help you make better decisions ask the right questions at the right time know what to look for when evaluating information and understand how your own brain subconsciously clouds your judgment Think you're too smart to be easily misled Harrison summarizes scientific research showing how easily even intelligent and well educated people can be fooled We all suffer from cognitive biases embellished memories and the tendency to kowtow to authority figures or be duped by dubious truths packaged in appealing stories And as primates we are naturally status seekers so we are prone to irrational beliefs that seem to enhance our sense of belonging and ranking Emotional impulses and stress also all too often lead us into

traps of misperception and bad judgment Understanding what science has discovered about the brain makes you better equipped to cope with its built in pitfalls Good Thinking the book and the practice makes clear that with knowledge and the right thinking skills anyone can lead a safer wiser more efficient and productive life **Minutes of Evidence Taken Before Her Majesty's Commissioners Appointed to Inquire Into the Subject of Agricultural Depression** Great Britain.
