This highly acclaimed text focuses on developing the abstract thinking essential for further mathematical study. The authors give early intensive attention to the skills necessary to make students comfortable with mathematical proofs. The text builds a gradual and smooth transition from computational results to general theory of abstract vector spaces. It also provides flexible coverage of practical applications exploring a comprehensive range of topics. Ancillary list Maple Algorithmic testing Maple TA www.maplesoft.com Includes a wide variety of applications technology tips and exercises organized in chart format for easy reference. More than 310 numbered examples in the text at least one for each new concept or application.
