**24V AC WEATHERPROOF  
POWER SUPPLY**

**VPSU2444EXTe MANUAL  
24V AC 4A (4 x 1A FUSED OUTPUT)**

Thank you for choosing this high quality 24V ac 4A weatherproof power supply. Before attempting to connect or operate this product please make sure you carefully read these instructions for your safety.

### General:

A 24V ac power supply capable of delivering fully rated current to load, housed within an IP68 enclosure allowing for external use; ideal for low powered CCTV installations.

### INSTALLATION AND SET-UP

This unit is only suitable for installation as permanently connected equipment and **MUST** be fed from a mains power source having a separate (approved) disconnect device - fitted with a fuse or other over-current protection device rated at 3A maximum.

The enclosure is rated at IP68; make sure that the appropriate connections made to and from the enclosure are to this level to retain the required IP rating for the product.

**Note: The lid of the enclosure is keyed and must be in correct orientation to ensure IP68 rating.**

The PSU should be installed according to all relevant safety regulations.

- 1) Fix to wall or other support structure using the screws/fixings supplied or use appropriate types for the surface it is being mounted to – note IP68 enclosure mounting holes are located within the lid screw apertures.
- 2) Mains input cable must be to the applicable standard with a 3A or greater current capacity, having a minimum operating voltage of 300/500V ac.
- 3) The low voltage output cable must be correctly sized to carry the rated load current to the devices connected to the PSU.
- 4) Mains input and low voltage output cables should be routed to use different entry/exit holes in enclosure.
- 5) To comply with current BS EN60950 safety legislation the supplied cable ties must be used to secure mains input and low voltage output wiring.

Prakash,C. Rolland,B. Pernici,2014-06-28 This volume aims to pave the way to a greater understanding of the information system development process Traditionally information systems have been perceived as a slice of real world history This has led to a strong emphasis on the development of conceptual models the requirements specifications of which can readily be expressed However the route to such an expression or the process of development has not received any substantial attention It is now agreed that a study of the development process affords notable benefits Firstly it helps to create an understanding of what a realistic development process is and how it proceeds from an initial specification to its acceptable representation Secondly the nature of guidance that can be provided by the next generation of CASE tools can be substantially improved It can be expected that these tools will cease to be mere drafting aids and consistency checking programs Instead it is likely that they will provide a procreative environment in which the development engineer will play an important role This tool user symbiosis should have a beneficial impact on both the productivity of the developer and on the quality of the product In bringing together researchers and practitioners from such diverse areas as AI Software Engineering Decision Support and Information Systems it is hoped this publication will take the quest to comprehend information system development processes a significant step forwards
