Reanimating Regions James Riding, Martin Jones, 2017-05-12 Writing regions undertaking a regional study was once a standard form of geographic communication and critique This was until the quantitative revolution in the middle of the previous century and more definitively the critical turn in human geography towards the end of the twentieth century From then on writing regions as they were experienced phenomenologically or arguing culturally historically and politically with regions was deemed to be old fashioned Yet the region is and always will be a central geographical concept and thinking about regions can tell us a lot about the history of the discipline called geography Despite taking up an identifiable place within the geographical imagination in scholarship and beyond region remains a relatively forgotten under used and in part under theorised term *Reanimating Regions* marks the continued reinvigoration of a set of disciplinary debates surrounding regions the regional and regional geography Across 18 chapters from international interdisciplinary scholars this book writes and performs region as a temporary permanence something held stable not fixed and absolute at different points in time for different purposes There is as this expansive volume outlines no single reading of a region *Reanimating Regions* collectively rebalances the region within geography and geographical thought In renewing the geography of regions as not only a site of investigation but also as an analytical

framework through which to write the world what emerges is a powerful reworking of the geographic imagination Read against one another the chapters weave together timely commentaries on region and regions across the globe with a particular emphasis upon the regional as played out in the United Kingdom and regional worlds both within and beyond Europe offering chapters from Africa and South America Addressing both the political and the cultural this volume responds to the need for a consolidated and considered reflection on region the regional and regional geography speaking directly to broader intellectual concerns with performance aesthetics identity mobilities the environment and the body **The Virginia Quarterly Review** ,2020 The Heart of the Matter Arthur Green,2015-04-01 Judaism like all the great religions has a strand within it that sees inward devotion as an opening of the human heart to God s presence This voice is not always easy to hear in a tradition where so much attention is devoted to the how rather than the why of religious living The devotional claim certainly a key part of Judaism s biblical heritage has reasserted itself in the teachings of individual mystics and in the emergence of religious movements over the long course of Jewish history This volume represents Rabbi Arthur Green s own quest for such a Judaism both as a scholar and as a contemporary seeker This collection of essays brings together Green s scholarly writings centered on the history of early Hasidism and his highly personal approach to a rebirth of Jewish spirituality in our own day In choosing to present them in this way he asserts a claim that they are all of a piece They represent one man s attempt to wade through history and text language and symbol an array of voices both past and present while always focusing on the essential question What does it mean to be a religious human being and what does Judaism teach us about it This the author considers to be the heart of the matter Publisher s description Catalog University of Texas. Library. Latin American Collection,1969
