guida ha l'obiettivo di illustrare in maniera semplice e mediante l'ausilio di esempi pratici come contabilizzare il costo del personale evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio soprattutto in presenza di eventi particolari come la malattia gli infortuni e così via e alle conseguenti ripercussioni in termini di imposizione fiscale. In virtù di questa considerazione al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte necessario valutare gli aspetti relativi agli oneri contributivi ed assicurativi al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina alle cui fondamenta soggiacciono i principi contabili si caratterizza per il gran numero di esempi che di fatto rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda volti a consentire un rapido approccio al lettore soprattutto in quelle situazioni di particolare urgenza come nel caso di dover calcolare il costo per esigenze di budget. Viene infine proposto un caso concreto di contabilizzazione del costo partendo dal cosiddetto cedolone vale a dire il riassunto avvenuto nel periodo di lavoro considerato.

A Successful Transformation? Petr Pavlínek, 2008-04-30 I started researching the dramatic changes in the automobile industry of Central and East European countries in the late 1990s. My interest grew out of my previous work on the post socialist transformation, foreign direct investment and regional economic development. While researching the economic and regional development effects of foreign direct investment I was increasingly drawn to the automobile industry because of the speed and depth of its transformation through foreign direct investment and its potentially very significant economic and regional development effects. In addition to working on the Central and East European automobile industry as a whole I became interested in detailed case studies of enterprise restructuring as I wanted to understand its complex nature and the role of different actors in the restructuring of the automobile industry. In order to achieve this goal I visited dozens of automotive enterprises especially in the Czech Republic. Czechia to conduct in-depth interviews with key informants. I have also interviewed key informants at ministries, automotive associations and academia and collected various secondary data and information. This book is the outcome of this work. In this endeavor I have benefited from various support. The University Committee on Research and Creative Activity at the University of Nebraska at Omaha funded three field work sessions in Czechia to conduct interviews and research for this book.

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European CE nations of Czechia, East Germany, Hungary, Poland and Slovakia from 1989 onwards. Enticed by relatively lower wage labour and significant government incentives the world's largest automakers have launched more than 20 passenger car assembly

complexes in CE nations with production accelerating dramatically since 2001 As a result the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015 and alternatively in the CEE it increased by nearly 170% during this period Drawing on case studies of 25 current and former foreign run assembly plants the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift This book will expand the knowledge of policy makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business economic history political science and development
