

The background of the book cover is a photograph of a large, dark, leafless tree in the foreground, its branches silhouetted against a deep blue twilight sky. Behind the tree is a two-story house with white horizontal siding. The central entrance door is white with a small transom window and is brightly lit from within, casting a warm glow. To the left of the door is a multi-paned window, and to the right is a larger window, both also illuminated from inside. The overall mood is mysterious and atmospheric.

Adventure Games Aaron A. Reed, John Murray, Anastasia Salter, 2020-02-20 The genre of adventure games is frequently overlooked Lacking the constantly evolving graphics and graphic violence of their counterparts in first person and third person shooters or role playing games they are often marketed to and beloved by players outside of mainstream game communities While often forgotten by both the industry and academia adventure games have had and continue to have a surprisingly wide influence on contemporary games in categories including walking simulators hidden object games visual novels and bestselling titles from companies like Telltale and Campo Santo In this examination of heirs to the genre's legacy the authors examine the genre from multiple perspectives connecting technical analysis with critical commentary and social context This will be the first book to consider this important genre from a comprehensive and transdisciplinary perspective Drawing upon methods from platform studies software studies media studies and literary studies they reveal the genre's ludic and narrative origins and patterns where character and the player's embodiment of a character is essential to the experience of play and the choices within a game A deep structural analysis of adventure games also uncovers an unsteady balance between sometimes contradictory elements of story exploration and puzzles with different games and creators employing a multitude of different solutions to resolving this tension *Transactions of the Pharmaceutical Meetings*, 1850
