

Slinky Wave Lab

Background

A wave can be described as an energy disturbance that travels through a medium from one location to another. Waves, simply put, are **energy moving** from one place to another. As the wave moves through the **medium** (water, slinky, air), energy is being passed from one particle to the next. Waves occur around us every day. Some common places we experience waves are in sound, light, water, and earthquakes.

In addition to being a great toy, the Slinky is an excellent device for creating and studying waves. A slinky can easily demonstrate the two basic types of waves, longitudinal and transverse. In a **longitudinal wave** the particles move parallel to the direction the wave is moving. In a **transverse wave** the particles move at right angles to the direction of wave travel.

There are three basic characteristics used to describe waves.

1. **Frequency** – The number of waves produced in a given time period. This is usually measured in waves per second called Hertz (Hz).
2. **Wavelength** – The length of a wave. This can be measured easily from crest to crest or from trough to trough.
3. **Amplitude** – The height or depth of a wave. The amount of energy carried by a wave is related to amplitude. A high energy wave is characterized by high amplitude; a low energy wave by low amplitude.

Hey, Bub! Steve Prater, 2016-10-27 Hey Bub was the familiar greeting Tom Prater used throughout his life. He was born with Down syndrome in 1949 and in spite of his disabilities became a beloved and integral part of his family and community. While his speech was limited to phrases of just a few syllables, he found other ways to communicate and won the hearts of everyone who met him. Despite being beset by health concerns and institutional systems that were far from ideal, he found resilience and joy. This is the story of two brothers, their childhood adventures, and their lifelong bond. In it, his brother Steve, bunk mate and partner in crime, reflects on their time together and the many lessons he's still learning from his older brother. When the world feels overwhelming or complex, we all seek answers from those who seem to have it all figured out. Tom leaves ample clues to happiness through his parables involving marshmallows, swing sets, bowling, and dancing. *The Science Teacher's Toolbox* Tara C. Dale, Mandi S.
