Principles of Foundation Engineering Braja M. Das,1990 Very Good No Highlights or Markup all pages are intact

Foundation Engineering S. Hansbo,1994-01-14 The object of this book is to shed light on the most important design aspects encountered in foundation engineering and to present basic design principles representative of the developed part of the world Modern geotechnical investigation methods and their interpretation are exemplified The philosophy of the new European code for geotechnical design is presented The most important and practical aspects of ground modification techniques are included This book can be used as a textbook for senior undergraduate and graduate students It can also serve as a combined text and handbook for professional engineers working in the field of geotechnical engineering Line drawings and photographs accompany the text

Higher Engineering Mathematics J. O. Bird,2010 John Bird s approach based on numerous worked examples and interactive problems is ideal for students from a wide range of academic backgrounds This edition has been extended with new topics to maximise the book s applicability for first year engineering degree students and those following Foundation Degrees

Databases for Data-Centric Geotechnics Kok-Kwang Phoon,Chong Tang,2024-12-20 Databases for Data Centric Geotechnics forms a definitive reference and guide to databases in geotechnical and rock engineering to enhance decision making in geotechnical practice using data driven methods This first volume pertains to site characterization The opening chapter presents an in depth analysis of site data attributes including the establishment of a new taxonomy of site data under 4S site generalizations spatial features sampling characteristics and smart data to provide a novel agenda for data driven site characterization Type 3 machine learning methods disruptive value are possible as sensors become more pervasive and more intelligent A comprehensive overview of site characterization information is also presented with a focus on its availability coverage value to decision making and challenges The remaining 13 chapters cover databases of soil and rock properties and

the application of these databases to rock socket behavior rock classification settlement on soft marine clays permeability of fine grained soils and liquefaction among others The databases were compiled from studies undertaken in many countries including Austria Australia Brazil Canada China France Finland Germany India Iran Japan Korea Malaysia Mexico New Zealand Norway Singapore Sweden Thailand the United Kingdom and the United States This volume on site characterization is a companion to the volume on geotechnical structures Databases for Data Centric Geotechnics represents the most diverse and comprehensive assembly of database research in a single publication consisting of two volumes to date It follows from Model Uncertainties for Foundation Design also published by CRC Press and suits specialist geotechnical engineers researchers and graduate students
