The TLX 7506 is a Radio Controlled Room Thermostat which requires no wiring and can be fitted in any normal operating environment within a typical fit rate range of the TLX 1206 RF Receiver.

The TLX 7506's unique security code is installed into the RF Receiver as part of the commissioning procedure ensuring that your RF Receiver will only respond to instructions sent to it from your TLX 7506 Thermostat. How this is done is detailed in the Commissioning Instructions later in the guide.

Operation

The TLX 7506 Digital Room Thermostat is simple to use. The large 12mm Liquid Crystal Display continuously shows actual room temperature.

To display the temperature requested (the Set Point) press and hold the button marked 'SET'. On releasing the button the display will reveal back to actual temperature.

To change the 'Set Point' (i.e. the temperature requested) press and hold the 'SET' button and at the same time press '+' or '-' to increase or decrease the temperature setting. The display will continue to show the 'Set Point' until the 'SET' button is released. The display will then show actual temperature.

When the TLX 7506 instructs your heating system to switch on a small flame symbol appears at the bottom right of the display. This symbol will be displayed only when the thermostat is calling for the heating system to be on.

Position

The ideal position to locate the TLX 7506 Digital Room Thermostat is about 1.5m above floor level, accessible, reasonably fit and free from extremes of temperature and draughts. Do not mount on an outside wall, above a radiator or where it may be subjected to direct sunlight.

The wireless nature of the installation means that the thermostat can now be positioned in any room to provide optimum thermal response rather than to minimise or simplify the installation wiring.

It is recommended the commissioning procedure be carried out before fixing the mounting plate to ensure the chosen location is suitable for transmitting and receiving radio signals.

Installation

Please read all installation instructions before proceeding.

The TLX 7506 Digital Room Thermostat is battery powered and operated by radio control. It does not require any electrical connections. If it is replacing an existing hard wired thermostat, remove and make safe the wiring to the old thermostat as it is no longer required.

All electrical wiring changes must be carried out by a competent person in accordance with the latest appropriate Wiring Regulations. Be sure to switch off the mains supply before removing any existing thermostat.

Fixing

1. The metal mounting plate supplied should be positioned with a minimum of 10mm clearance to left, right, above and below to allow adequate airflow.
2. Fix the mounting plate directly to a flat wall using the wall plugs and screws provided.
3. Remove the battery isolation strip protruding from the rear of the unit. Check the unit is functioning and fit to the metal mounting plate on the wall.

Configuring

The unit is supplied with a 5°C minimum temperature set point and configured as a heating thermostat as factory default. Two internal links can be used to re-configure these defaults.

1. Open the unit by slackening the retaining screws on the lower side and hinge unit upward along the top edge to separate it from the plastic base. Remove the batteries.
2. Locate and identify the two option Links 1 and 2. Use a pair of small wire cutters to carefully cut the appropriate links to give the required configuration.
3. Cutting Link 1 will give a minimum temperature set point of 16°C (factory default is 5°C). Cut Link 2 to display cooling symbol instead of heating symbol. (Please ensure the RF Receiver (TLX 1206) is wired for a cooling application (i.e. using terminals 2 and 4)).
4. Carefully replace batteries being sure to observe the correct polarities. Re-fit plastic base and tighten retaining screws. Check unit is functioning as required and fit to metal mounting plate on the wall.

Battery Replacement

This is the only maintenance required for this product.

A 'Warning' battery low symbol will appear at the bottom left of the display when the batteries start to approach the end of their life. This indicates that they should be replaced within the next month. Normal operation will be maintained during this period. Ultimately the complete display will shut heating at which time the thermostat will switch off the heating and shut down until the batteries are replaced.

To replace the batteries the following procedure should be carried out.

1. Remove the unit from the wallplate by sliding upwards and gently pulling away from the wall. Slacken the retaining screws on the unit and open by hinging upwards along the top edge.
2. Carefully remove batteries from the battery compartment and fit two new 1.5V alkaline cells being sure to observe the correct battery polarities. Check unit is functioning and re-fit to the plastic base by hinging downwards from the top edge. Ensure unit is properly closed and re-tighten the retaining screws.
3. Reconnect into the metal wall-plate and check the TLX 7506 is still in radio communication with the RF Receiver. This is easily done by adjusting the set point to switch on and off the heating system several times and checking the green indicator on the RF Receiver goes on and off accordingly.
