Green,2019-06-25 During World War II 12 000 Allied prisoners of war died while constructing a bridge over the river Kwai in western Thailand and then a railway through the thick jungles of the Kwai Valley all the way to Burma Decades later during the Vietnam War Jonathan R C Green enlisted as a medic in the U S Army expecting to take care of wounded Americans and Asians but was kept in a Stateside assignment instead much to his frustration So shortly before his enlistment expired he applied for the Peace Corps and asked to serve in Southeast Asia Six weeks after leaving the Army he arrived in Thailand as a Peace Corps Volunteer His job assignment was to fight malaria by controlling the mosquito populations in remote jungle villages in the valley of the infamous River Kwai Besides the hazards posed by snakes scorpions and centipedes in the jungle he ran the risk of contracting malaria dengue fever and other mosquito borne diseases while suffering severe bouts of dysentery He often had to live on a monotonous diet of rice bamboo shoots and hot sauce three times a day with the only reasonably safe drinking water coming from rain barrels teeming with mosquito larvae While becoming accustomed to a rugged lifestyle in the jungle he had to quickly learn a complex language and exotic culture An inadvertent misstep in manners could have damaged his credibility and hence the outcome of his undertaking as badly as catching the disease he was supposed to be fighting Beyond Tests and Quizzes Richard J. Mezeske,2007-10-12 Beyond Tests and Quizzes Because the drive toward external assessment speaks almost exclusively in terms of standardized testing we need to be reminded of the internal purposes of assessment measuring learning for both student and teacher so that instruction can be adjusted and improved This book is written for college instructors who are striving to creatively change assessment practice to better reflect learner centered teaching It is intended to consider not only the multiple ways in which individuals learn content but also the multiple avenues to assessment the variety of learning styles demands Creative assessment is defined here as assessments that spin twist and reform what might be a standard kind of assessment in an ordinary classroom Instructors should use these examples of creative assessment as starting points and as the beginnings of an internal discussion on what matters most in the courses they teach What components of each course count the most for solving a range of problems in the discipline If facts are important and they usually are how can they be used to support a flexible approach to thinking solving considering options and gathering and interpreting evidence What are

the facts not telling us The approaches suggested in this book focus on learning on what students can do as a result of learning and on how teachers can observe what students do The assessment models presented here include concept mapping variable grading learning logs moving from memorization to analysis making labs more practical exams as learning experiences web based assessment thinking styles tracking learning over time and assessment in the real world Each translates to a range of academic settings and is easily adaptable for use by a variety of instructors in any discipline
