Handbook of the Economics of Finance SET: Volumes 2A & 2B George M. Constantinides, Milton Harris, Rene M. Stulz, 2013-01-21 This two volume set of 23 articles authoritatively describes recent scholarship in corporate finance and asset pricing. Volume 1 concentrates on corporate finance encompassing topics such as financial innovation and securitization dynamic security design and family firms. Volume 2 focuses on asset pricing with articles on market liquidity credit derivatives and asset pricing theory among others. Both volumes present scholarship about the 2008 financial crisis in contexts that highlight both continuity and divergence in research. For those who seek insightful perspectives and important details they demonstrate how corporate finance studies have interpreted recent events and incorporated their lessons. Covers core and newly developing fields. Explains how the 2008 financial crises affected theoretical and empirical research. Exposes readers to a wide range of subjects described and analyzed by the best scholars.

Health Effects of the New Labour Market Kerstin Isaksson, Christer Hogstedt, Charli Eriksson, Töres Theorell, 2005-12-11 The background for the international research conference Health Hazards and Challenges in the New Working Life was the emerging questions concerning the health and social effects of the rapid changes in the labour market leading to increasing long term unemployment temporary employment and irregular employment contracts. We knew that other countries have had this development at the labour market for a much longer time than Sweden has and it seemed a good idea to invite interested researchers and practitioners to an international seminar to share the relevant research findings and discuss future research needs. Thus the first international interdisciplinary research conference on Health Hazards and Challenges in the New Working Life was arranged in Stockholm during the last year of the 2nd millennium but was directed towards the foreseen development during the next millennium. We were very pleased that more than 200 participants came to a cold and dark country just after New Year's Eve and that it was a truly multidisciplinary setting. It became very obvious that it is necessary for the occupational health and

safety research community to reach out to the public health research community as well as to the social and political sciences in order to understand the determinants and to perform comprehensive analyses at several levels in this new labour market situation
