the end of World War II actually began during the 1880s as the Marine Corps sought to define its role in the new Steel Navy. Officers braved skepticism, indifference and outright opposition to develop an amphibious warfare doctrine with each service contributing. From the 1898 war with Spain through the disastrous 1915 Australian landing to the successful World War II assaults in the Pacific and northwest France, this chronological history explores the successes and failures pivotal to the concept of amphibious warfare through the lives and careers of fourteen officers instrumental to its development. Artificial Intelligence in Education, R. Luckin, K.R. Koedinger, J. Greer, 2007-06-29. The nature of technology has changed since Artificial Intelligence in Education (AIED) was conceptualised as a research community and Interactive Learning Environments were initially developed. Technology is smaller, more mobile, networked, pervasive and often ubiquitous as well as being provided by the standard desktop PC. This creates the potential for technology supported learning wherever and whenever learners need and want it. However, in order to take advantage of this potential for greater flexibility, we need to understand and model learners and the contexts with which they interact in a manner that enables us to design, deploy and evaluate technology to most effectively support learning across multiple locations, subjects and times. The AIED community has much to contribute to this endeavour. This publication contains papers, posters and tutorials from the 2007 Artificial Intelligence in Education conference in Los Angeles, CA, USA. *Armor*, 2012. **The Marine Corps Gazette**, 1982. *The 2002 Guide to the Evaluation of Educational Experiences in the Armed Services*, American Council on Education, 2002.
