Environmental Science and Information Application Technology David Chan, 2015-06-29 Environmental Science and Information Application Technology contains selected papers from the 2014 5th International Conference on Environmental Science and Information Application Technology ESIAT 2014 Hong Kong 7 8 November 2014 The book covers a wide variety of topics Global Environmental Change and Ecosystems Management Graphic and I *Redefining Education and Development* Kaitano Dube, 2024-10-18 The book aligns with the United Nations Sustainable Development Goals SDGs particularly Goal 4 which focuses on quality education It explores the evolving role of education as a critical driver for achieving all 17 SDGs by providing a platform for discussing innovative educational models and theories that foster sustainable development The book takes an interdisciplinary approach merging educational theory developmental practice and human psychology to address complex global challenges hindering sustainable development The book includes case studies and empirical research such as exploring student entrepreneurship in the agricultural sector and the factors bridging the gap between entrepreneurial intention and venture creation These examples provide readers with practical applications of theoretical concepts and demonstrate the real world impact of educational innovations which is at the core of education delivery for all and how education touches on other areas of the SDGs The book offers valuable insights for policymakers educators and development practitioners by presenting research and theory based analyses It suggests ways to improve the academic environment to foster entrepreneurship and innovation which are key to economic development and job creation especially in regions with high youth unemployment rates The content suggests educational reforms that are responsive to the changing societal and economic landscapes The book's blend of theory and practice targets a broad audience including academic scholars students development agencies non governmental organisations and policymakers It seeks to engage these diverse readers in a conversation about the future of education and its role in achieving sustainable development In summary the book seeks to provide a comprehensive exploration of the nexus between education development and human needs in the context of the SDGs offering innovative perspectives and practical solutions to equip readers to contribute to sustainable global development

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the

relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Nanotechnology: A Quick Guide to Materials and Technologies Divya Bajpai Tripathy, Anjali Gupta, Arvind Kumar Jain, Anuradha Mishra, Tokeer Ahmad, 2024-10-07

Nanotechnology A Quick Guide to Materials and Technologies invites readers to explore the cutting edge world of nanotechnology offering a comprehensive yet accessible introduction to this rapidly evolving field The content provides a foundation for understanding the field and details the properties of significant nanomaterials Readers will also gain insights into innovative processes while receiving a balanced perspective on the social and regulatory aspects of nanotechnology Key Features Foundational Knowledge Begins with an overview of nanotechnology its history and its key concepts Diverse Nanomaterials Explores various types of nanomaterials including nanoparticles nanowires and carbon based materials like graphene detailing their properties and potential applications Advanced Applications Explores the real world uses of nanotechnology across multiple sectors such as medicine electronics energy and environmental science demonstrating its transformative impact Fabrication and Characterization Covers techniques for creating and analyzing nanomaterials offering insights into the processes that drive innovation in the field Ethical and Societal Considerations Discusses the broader implications of nanotechnology including ethical societal and regulatory aspects Ideal for students educators researchers and industry professionals this guide serves as an informative resource for anyone looking to deepen their understanding of nanotechnology

Energy Technology 2018 Ziqi Sun, Cong Wang, Donna Post Guillen, Neale R Neelameggham, Lei Zhang, John A. Howarter, Tao Wang, Elsa Olivetti, Mingming Zhang, Dirk Verhulst, Xiaofei Guan, Allie Anderson, Shadia Ikhmayies, York R. Smith, Amit Pandey, Sarma Pisupati, Huimin Lu, 2018-01-30 This collection focuses on energy efficient technologies including innovative ore beneficiation smelting technologies recycling and waste heat recovery The volume also covers various technological aspects of sustainable energy ecosystems processes that improve energy efficiency reduce thermal emissions and reduce carbon dioxide and other greenhouse emissions Papers addressing renewable energy resources for metals and materials production waste heat recovery and other industrial energy efficient technologies new concepts or devices for energy generation and conversion energy efficiency improvement in process engineering

sustainability and life cycle assessment of energy systems as well as the thermodynamics and modeling for sustainable metallurgical processes are included This volume also includes topics on CO2 sequestration and reduction in greenhouse gas emissions from process engineering sustainable technologies in extractive metallurgy as well as the materials processing and manufacturing industries with reduced energy consumption and CO2 emission Contributions from all areas of non nuclear and non traditional energy sources such as solar wind and biomass are also included in this volume Papers from the following symposia are presented in the book Energy Technologies and CO2 Management Advanced Materials for Energy Conversion and Storage Deriving Value from Challenging Waste Streams Recycling and Sustainability Joint Session Solar Cell Silicon Stored Renewable Energy in Coal Tourism and Hospitality for Sustainable Development Emmanuel Ndhlovu, Kaitano Dube, Ngoni Courage Shereni, 2024-09-12 The tourism and hospitality industry in the 21st century cannot be adequately planned executed marketed managed or studied without taking into account digital technology and its impact The Fourth Industrial Revolution provides the framework for sustainable development in this sector Technology not only increases profitability but also enables the industry to effectively respond to pressing global sustainability challenges such as pandemics climate change energy crises staffing shortages and hyperinflation Moreover technology allows the industry to consider its current and future economic social and environmental consequences addressing the needs of tourists the industry the environment and destinations However implementing technology efficiently and ethically is a complex process and the opportunities costs and challenges vary depending on the geopolitical and socio economic context The application of digitalisation and technological innovations have played a significant role in promoting universal design and reasonable accommodation for older adults and individuals with disabilities in both developed and developing countries These advancements are crucial for the growth of accessible tourism and hospitality This edited book aims to explore the trends challenges and complexities of integrating digitalisation and technology into the tourism and hospitality industry It also examines the strategic shifts that will shape future research in this area The book provides a comprehensive overview of the current state of research including theoretical insights empirical evidence and evidence based recommendations It covers a range of technologies such as blockchain robots artificial intelligence virtual reality big data and analytics The goal is to understand how these disruptive technologies are being used and their potential impact on various stakeholders as well as their future possibilities and limitations Bioplastics for Sustainability Ajay Kumar Mishra, Chaudhery Mustansar Hussain, 2024-02-02 Bioplastics for Sustainability Manufacture Technologies and Environment offers an innovative approach to bioplastics integrating state of the art materials and technologies with detailed analysis of lifecycle recycling circularity and environmental impact of bioplastics and enabling circular utilization and successful scale up of bioplastics The book begins by introducing the fundamentals of bioplastics including biodegradable compostable and oxodegradable materials and discusses the various factors involved in encouraging commercial uptake of these materials The second part of the book

highlights cutting edge approaches to the production of bioplastics covering novel sources such as microalgae and organic waste and solutions for industrial scale manufacturing Other sections cover the environmental impact of bioplastics and routes to environmentally friendly usage and more This is a valuable resource for researchers and advanced students across polymer science sustainable materials plastics engineering materials science chemistry environmental science and engineering In an industrial setting this book supports engineers scientists and R D professionals with an interest in sustainable manufacture and application of bioplastics across a range of products parts and industries Presents the latest advances in novel materials and manufacture techniques for bioplastics Focuses on sustainable use of bioplastics assessing biodegradability life cycle recycling waste and environmental impact Addresses other key considerations such as industrial scale up commercialization policies and regulation

Sustainable Development Goals for Society Vol. 2 Godwell Nhamo, David Chikodzi, Kaitano Dube, 2021-06-26 This book profiles various cases that are emerging in addressing global challenges in the context of SDGs for society in the era of climate change and covers case studies of projects being undertaken to tackle biodiversity food security climate change energy and water security The book is written by 37 authors and will appeal to various stakeholders including academics working within the identified thematic areas policy planners development agencies governments and United Nations agencies The adoption of the Sustainable Development Goals SDGs in 2015 ushered a new era in the global development agenda as the world transitioned from the Millennium Development Goals MDGs The new era of SDGs that are all inclusive unlike the MDGs with the focus now being on ensuring human success that is predicated on environmental protection The year 2020 marked five years post the adoption of the SDGs with increased calls for stock taking of progress made amid strong calls for a decade of action to accelerate the delivery of the SDGs by 2030 These calls have been louder now given the impact of the COVID 19 pandemic which reset the global economy and increased intensity of extreme weather events across the world Since climate change has emerged as one of the biggest threats to the achievement of the SDGs there has been growing concerns on its impact on biodiversity loss and the extinction of some species There are also concerns regarding increased food insecurity at the household level in some parts of the world particularly in Asia and Africa With the demand for climate change action on the increase there have also been growing calls for the big carbon emitters to drastically cut their emissions and invest in clean energy to save the planet by following development pathways making emissions stay under the 1.5 °C increase in temperature

Plant Genetic Resources, Inventory, Collection and Conservation Siva Ramamoorthy, Inocencio Jr. Buot, Rajasekaran Chandrasekaran, 2022-06-22 This edited book deals with plant genetic resources and their status availability and ecological niche in natural habitat Usage and conservation practices followed by various tribal communities and their rationale are also discussed in the book The book explores application of biological tools to conserve plant species and optimization protocols for conservation and elicitation of secondary metabolites and other value addition products The book is organized into sub

themes covering i Ecological status of plant genetic resources ii Traditional ethnobotanical knowledge and conservation practices iii Ex situ conservation practices and bioprospecting Globally plant genetic resources are deeply rooted in culture and economy Since the early 1990s the changing socio economic situation has increasingly put pressure on plant genetic resources in some cases leading to a severe loss of their diversity For this reason most vulnerable areas at risk of genetic erosion have been demarcated and protected by forest laws and regulations Therefore this book brings to light the opinions of leading experts in the area of ecology conservation biodiversity ethnobotany and bioprospecting of plant genetic resources The book is for use by graduate and advanced undergraduate students and researchers in plant physiology molecular biology biochemistry and agriculture Additionally it is extremely useful as a general reference on conservation of flora and large scale cultivation

Green Economy in the Transport Sector John Ogoni Odiyo, Peter Bitta Bikam, James Chakwizira, 2021-12-08 This open access book is interdisciplinary and provides cross sectoral and multi dimensional exploration of sustainable development and transportation in South Africa Drawing on work from different disciplines the book contributes not only to academia but also seeks to inform urban and regional policy with the view of contributing to the national aspirations of South Africa as espoused in the National Development Plan NDP 2030 National Spatial Development Framework NSDF Draft 2019 National Climate Change Adaptation Strategy NCASS Draft 2019 Green Transport Strategy for South Africa 2018 2050 and National Transportation Plan NATMAP 2050 Adopting a multi dimensional assessment the book provides a background for co production concerning climate change sustainable development and transportation in the Global South The book contributes in its analysis of the institutional and legislative framework that relates to the climate change skills and knowledge transfer sustainable development and transportation in South Africa as these are responsible for the evolution of the green economy and transport sector in the country The connections among different sectors and issues such as environment transport modes technology innovation vehicle management and emission control skills and knowledge transfer legislative and policy framework and the wider objectives of the sustainable development goals SDGs especially goals 11 to 13 The success stories relating to climate change sustainable development and transportation in South Africa are identified together with the best possible practices that may inform better environmental urban and regional planning policy practice and management

Quality Management Implementation in Higher Education: Practices, Models, and Case Studies Sony, Michael, Karingada, Kochu Therisa, Baporikar, Neeta, 2019-08-02 Although initially utilized in business and industrial environments quality management systems can be adapted into higher education to assess and improve an institution s standards These strategies are now playing a vital role in educational areas such as teaching learning and institutional level practices However quality management tools and models must be adapted to fit with the culture of higher education Quality Management Implementation in Higher Education Practices Models and Case Studies is a pivotal reference source that explores the challenges and solutions of designing quality management models in the current educational culture

Featuring research on topics such as Lean Six Sigma distance education and student supervision this book is ideally designed for school board members administrators deans policymakers stakeholders professors graduate students education professionals and researchers seeking current research on the applications and success factors of quality management systems in various facets of higher education Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration **Microbial Biotechnology: Integrated Microbial Engineering for B3 - Bioenergy, Bioremediation, and Bioproducts** Maulin P. Shah, Kiran Bala, 2025-05-15 This book highlights the latest advancements in microbial biotechnology and its crucial role in promoting sustainable development across three key areas bioenergy bioremediation and bioproducts It emphasizes the potential of microbes as renewable sustainable resources capable of generating high value products and acting as efficient alternatives to conventional methods Key topics included algal bacterial and fungal biotechnology focusing on producing biomass and valuable metabolites through CO2 sequestration concurrent bioremediation resource recovery and environmental sustainability This book presents cutting edge information on how integrated microbial engineering can valorize waste while sustainably generating essential resources Additionally it explores how microbes can help address critical challenges such as resource depletion and pollution management offering solutions for a more sustainable future Explores cutting edge technologies in microbial biotechnology including the production of high value products using microbes such as bacteria fungi and algae Elucidates strategies like mycoremediation microbial degradation and integrated CO2 sequestration with bioremediation to address pressing environmental challenges Understanding the potential of algae and purple bacteria in waste valorization and circular economy models including biodiesel production and wastewater treatment Provides comprehensive information on the emerging therapeutic possibilities of microbial systems and their role in disease control Examines the role of microbes in enhancing plant growth as biofertilizers contributing to sustainable agricultural practices

and improved regional water quality through microbial bioremediation

High Value Manufacturing: Advanced

Research in Virtual and Rapid Prototyping Paulo Jorge Bártolo, 2013-09-16 High Value Manufacturing is the result of the 6th International Conference on Advanced Research in Virtual and Rapid Prototyping held in Leiria Portugal October 2013 It contains current contributions to the field of virtual and rapid prototyping V RP and is also focused on promoting better links between industry and academia This book contains current contributions to the field of virtual and rapid prototyping V RP and is also focused on promoting better links between industry and academia It covers a wide range of topics such as additive and nano manufacturing technologies biomanufacturing materials rapid tooling and manufacturing CAD and 3D data acquisition technologies simulation and virtual environments and novel applications The book is intended for engineers designers and manufacturers who are active in the fields of mechanical industrial and biomedical engineering
