Financial Statement Analysis Thomas R.

Robinson,Paul Munter,Julia Grant,2004 Robinson Munter and Grant s Financial Statement Analysis A Global Perspective is designed especially for users of financial statements Takes a financial statement analysis perspective The focus is on the user of financial statements and not the preparer of financial statements The emphasis is on the analysis and use of financial reports Knowledge of debits and credits is not required Emphasizes a global perspective by presenting both International Accounting Standards and U S GAAP Uses a step by step presentation to take students through the financial statement analysis process from understanding the financial statements to valuation Motorola and Nokia are used as running case

examples throughout the text. Additional real world examples are integrated into each chapter as appropriate. Assignment Materials: Many of the end of chapter problems have been reproduced from AIMR CFA R examination released questions and sample examinations. Each chapter has a case derived from real company financial statements that can be used for class discussion or student projects.

Become Data Driven with IBM Z Infused Data Fabric Makenzie Manna, Roger Bales, Colton Cox, Lakshmana-Narasimhan Ekambaram, Ravi Kumar, Karen Medhat, Ruben Thumbiran, IBM Redbooks, 2022-08-02. The expansion of digital transformation initiatives resulted in the exponential rise of data generation. It is now apparent that for organizations to meet their rapidly changing business needs, they must use their most current data to fuel their insights. However, how to do so efficiently and effectively is still a challenge for most organizations that are trying to solve today's complex business problems. Contributing to this challenge is that organizations are turning to a hybrid cloud approach of their IT infrastructure, scaling to include on-premises and cloud environments in response to the data growth. This approach results in the requirement to integrate various data formats from disparate data sources into a central and unified view for use in analytics and AI, with security and privacy as a top priority. As a solution, organizations are adopting the emerging architectural approach. This approach enables efficient data integration across environments, simplifies the delivery of disparate data throughout an organization, and enables self-service data consumption and governance. Organizations with investments in the IBM Z platform have a unique opportunity to integrate them into their data fabric strategy. A data fabric strategy makes mission-critical data that is on Z readily available for real-time decision making by using data where it originates, which achieves faster time to insight. This IBM Redbooks publication introduces the emerging concept of a data fabric and how integration of valuable data that is stored on IBM Z enables deeper insights and improved AI capabilities. The intended audience for this publication includes data science professionals such as Data Stewards who want to develop and implement practices for building out a data governance framework that is facilitated by data fabric for AI workloads on IBM Z. The audience also can include anyone who wants to use the rich capabilities of the IBM Z environment by using a data fabric that is infused with their business-critical data and applications that are on the platform.
