headache behind the eye Every step explains point location direction of force and duration of massage No previous
experience necessary Total treatment duration 10 to 15 minutes How acupressure works Nobody knows how acupressure
works Very often pain is caused by a self perpetuating mechanism pain causes the mind to be attentive to pain that in turn
causes more pain and even more attention and so on Most likely acupressure works by interrupting this vicious circle How
does acupressure interrupt the cycle Stimulation of active points is thought to lead to increased release of endorphins
Endorphin is a natural body painkiller Endorphin and morphine are chemically different molecules but by coincidence they
have very similar 3 dimensional shape This similarity in shape allows morphine to bind the endorphin receptor and reduce
pain Thus endorphin released by acupressure stimulation may lead to temporal reduction of mind's attention to pain
